Win an iPod!
Not only do we want to give you all the information you need to get started on choosing a career path that’s right for you, we also want to give you a fabulous prize for taking the time to let us know how we’re doing! How cool is that?

It won’t take long at all. It would probably take longer to download all of your favourite songs than to provide us with a little bit of feedback.

So, what did you like about this year’s Relevance Magazine? The profiles? The articles? The Job Chart? Tell us what we can do to make the magazine even better next year. After all, this magazine is for you!

Just fill out this short questionnaire and you’ll be entered to win an iPod! Carry thousands of songs with you to suit any mood you might be in. From hip hop to country or pop to metal, you can have your favourite artists right at your fingertips! Good luck!

### 1. I am a
- high school student
- college student
- university student
- employed youth
- unemployed youth
- teacher/educator
- band or tribal council employee
- unemployed adult
- employed adult (specify your interest)

### 2. Where did you get your copy of “Relevance”?
- high school
- college
- university
- band or tribal council office
- friendship centre
- employment centre
- friend
- parent
- other (specify)

### 3. Was “Relevance” used in the classroom?
- yes
- no

### 4. Did you attend a career fair or symposium this year, or do you plan to?
- if yes (where)
- if no (why not)

### 5. Have you shown “Relevance” to your parent or guardian?
- yes
- no
- not relevant

### 6. Which article(s) did you find most interesting/useful, and why?

### 7. Do you have any suggestions for the next issue of “Relevance”?

Please mail to: Relevance Magazine, Box 2770, Prince Albert, SK S6V 7M2
Attn: V. Hill or Fax 306.764.2857 Deadline for submissions: April 30, 2008

Selling your skills:

A great cover letter is key to getting an interview!

So you've come across a job that seems perfect for you: You've got the skills and qualifications needed, it's a job you're really interested in and it will give you the experience you need to keep moving forward on your career path.

So what do you need to do? You've got your resume ready to go and a list of references who can say how great you are and why you would be perfect for the job. That's great, but there's one more thing you'll need: a cover letter.

The cover letter is where you get to tell a potential employer why you would be the perfect person for the job. Your resume has all the facts like your education level and work experience, but the cover letter is where you get to brag about how great you really are. Think of it as a selling tool.

Tips for creating an incredible cover letter:

1. Cover the basics: Make sure all of the important details, like your address, phone number and email address are included and correct. Once you've convinced your future employer that you're the right person for the job, they need to be able to get in touch with you right away.

2. Check and double-check (but don't just spell-check!) your spelling and grammar: This is highly important! Even if the job you're applying for doesn't involve a lot of reading or writing, you still need to make sure your spelling and grammar is perfect in your cover letter. Have a parent or teacher read it for you to help you catch any mistakes you may have missed. And don't rely on the spell-check on your computer: You could say “an” instead of “and” by mistake and the computer could miss that!

3. Make it crisp and clean: Make sure your cover letter is clean and free of any wrinkles. You don't want it to look like you just dug it out from the bottom of your bag!

4. Keep it simple: Explain why you're the best person for the job, but don't go overboard using big words or complicated phrases in an effort to impress.

5. Keep it short: A cover letter fits on one page. You're not writing a report or an essay. Be clear and concise in your letter. You want your future employer to be able to read it quickly and clearly understand why he or she should hire you.

6. Keep it in order: Make sure your cover letter is organized. Start by explaining which job you are applying for, why you would be perfect for the job and how they can get in touch with you for an interview.

Remember, a cover letter is a selling tool. It compliments your resume by allowing you to highlight your skills and achievements that would help you excel in that particular job. It's a potential employer's first impression of you and you need to make it great.

There are a lot of resources available to help you write your cover letter. You can go online to find different examples of cover letters to help you out. Also, ask your parents, teachers, or guidance counselor for help too.
Kyrie Kristmanson
Musician

“LOVE what you love! Then WORK very hard for it.”

On a different note:

In her CD player right now:
Patti Smith.

On her way up: Her music is taking her around the world! She was recently in Bordeaux, France where she opened for Feist.

Up for an award: Kyrie has been nominated for a Canadian Folk Music Award for Young Performer of the Year. The Awards Ceremony was on December 1 in Quebec.

Favourite quote:
“The essential is invisible to the eye.”
- Antoine de Saint-Exupéry.

Her biggest regret so far:
Buying a rose for Bruce Cockburn at a Folk Festival they were both playing at. She had an opportunity to give it to him, but didn’t. She wishes she had because she really respects his work.

Who she wants to perform with:
Joni Mitchell.
Kyrie...singing her way to success

You'd think that someone who wanted to be a full-time musician would pursue her career by studying music. Well, 18-year-old Kyrie Kristmanson has been studying and developing her musical talent since she was nine years old – that's half her life! But she's also preparing for her music career by pursuing a bachelor of humanities at university. Why? Kyrie tells us that and more in her interview with Relevance Magazine. She shares the details of her journey to success and how she got started on following her dreams!

Relevance Magazine: Tell us about yourself.

Kyrie Kristmanson: I was born in Ottawa, but I lived in many places as a child, including Ontario, England, Quebec, New Brunswick and Saskatchewan. My father used to read my sister and I an illustrated book of the history of Canada before we went to bed. I remember feeling excited by the stories: the sense of danger, the unknown. It's the need for this feeling, I think, that eventually led me to write songs.

RM: What are your songs about?

KK: My songs are about all kinds of things. I'd rather you listened to them for yourself. My songs are about love, in one form or another. I think most things are about love, or the lack of it.

RM: When did you realize you wanted to be a musician?

KK: My father gave me a guitar for my ninth birthday and soon after I began taking classical guitar lessons. The finger picking techniques I learned during those lessons are the foundation for my guitar playing. In grade six I began playing the trumpet in my school band program and there I was taught the bulk of what I know by many talented teachers. I was a small girl and the band directors told me I was best suited for the flute; so naturally I chose the trumpet! I continue to play both the guitar and trumpet.

I also sang in choirs throughout elementary and high school. I loved singing and harmonizing in groups and was instructed by many talented choral conductors, though I was often told my voice was not very choral. I knew I wanted to improve my vocal range and ability, but I didn't spend too much time worrying about making it a "choral" voice. There were many other people who were good at that already. Besides, the singers who most move me, like PJ Harvey, Björk and Buffy Sainte-Marie, have very idiosyncratic voices.

RM: Did you always know what you wanted to do career-wise?

KK: No. I did not always know what I wanted to do career-wise. I discovered quickly, though, what felt good and what didn't. I feel most alive and able to give when I'm singing and writing songs. It's how I'll contribute best, I think. I am prepared to work very hard to be able to sing and write songs as a career.

RM: If you're pursuing a career in music, why are you studying humanities in university right now?

KK: I'm studying the humanities (philosophy, classics, religion, modern languages and music) because I am very interested in humans and in the wisdom we've collected over time. This is central to my songwriting.

RM: Do you want to remain an independent musician or do you want to sign on with a major label?

KK: Depends what the offer is. Are you offering?! (laughs) Independent musicians are more empowered today than ever before, I think. With the advent of MySpace and many exciting and innovative indie labels, a musician can be very successful on his or her own.

RM: How has your music changed as you've gotten older?

KK: It's matured like I have!

RM: Describe your music style.

KK: I call it modern-folk: the rules are, there are no rules!

RM: Tell us about your first time performing in front of a crowd.

KK: My first professional gig was at the Winnipeg Folk Festival on the young performer's stage. I was with about five other singer/songwriters and we took turns playing our songs. It was a hot, cloudless prairie day and it was no less than 37 degrees! I remember practicing and practicing in the woods surrounding the campsite where I was staying. I remember the anticipation and being relieved at how receptive the audience was! They followed the songs and laughed at the funny parts. At the end of it, I felt like we were only just getting warmed up. I felt at home.

RM: Who have you performed with?

KK: I've had the honour of performing alongside many artists and bands that I have a lot of respect for. At the Regina Folk Festival in 2006, I played alongside Feist and American-folk hero Utah Phillips. This year I played alongside Sarah Slean, Cuff the Duke, Amy Millan, Mother Mother, and Blue Rodeo, among others. On CBC's Fuse show, I had the great honour of playing alongside Canadian roots-rock legend The Skydiggers.

RM: Where do you hope to end up?

KK: I want to end up writing the songs I feel compelled to write. Every song I finish, I feel, is getting closer to something I want to say, a statement I want to make. I hope to end up saying whatever that thing is that is mine to say. I also speak French and Spanish, so I plan to write more songs in those languages, too.

RM: What's the best advice you've received?

KK: I feel very fortunate to have a supportive family that often gives me a lot of good advice. I am very grateful for that advice, though, I read in Mary Oliver's poem Wild Geese. In it she writes: “You do not have to be good...You only have to let the soft animal of your body love what it loves.” I think this is good advice. If you allow your soul to act in accordance with its nature, you will be good no matter what. Like your body, I think your soul is at its best when it is fed healthy things. What makes a soul healthy, though, varies from person to person.

RM: What advice do you have for young people?

KK: Love what you love! Then work very hard for it.

Intrigued? Interested? Want to hear more?

You can get Kyrie's music by downloading it from iTunes, visiting her MySpace page at: www.myspace.com/kyriekristmanson, or by buying her album at any Chapters, HMV or Music World store in Canada (you’ll just have to ask them to order it).
It’s a question worth asking yourself. Relevance suggests sitting down with a pen and paper and writing down the pros and cons of having a job. This won’t take long. If you currently work, use your next break. Buy yourself a $4 latte and consider what employment adds to your life. If you’re currently not employed, the exercise is the same. You just may have to do without the coffee!

Okay, this oversimplifies the issue just a little. Employment is not merely about having cash to burn on designer coffee or other overpriced consumer goods. It’s about self-perception; about the kind of person you want to be. Do you want to be self-sufficient and independent, or are you fine with merely scraping by? And if you do work, are you willing to do anything, or would you rather find a career that you enjoy and feel good about?

We are certain that anyone who takes a moment to think about it will realize that the advantages of working far outweigh the disadvantages. To help you explore this issue, we have asked SaskTrends Monitor to crunch some numbers and identify a few Relevant employment trends in Saskatchewan:

Money Doesn’t Buy Happiness

True, but it does allow you to feel depressed in more exotic locations.

Whether we want to admit it or not, we’re all somewhat dependent on the dollar. All of the essentials—food, shelter and clothing—cost money. So does transportation; whether you bounce at intersections in a tricked-out Impala, ride a longboard or use public transport. No sense in beating this point to death. You know this as well as anyone. Money increases your options and gives you independence. And for most of us, money comes from employment.

Most People Work

It’s true. In the middle, 25 to 54 age group, 85% of us work at a paid job. Many of the remaining 15% indicate that they would like to work.

Work = Money

On average, full time workers in Saskatchewan earn $43,000 a year. Those who do not work will make considerably less - $15,000 per year on average. This adds up. Over the course of a normal working career, individuals with steady jobs will earn nearly two million dollars. Many will earn much more. Over the same period, those who do not work will receive less than half this amount, likely through government assistance or other financial aid.

Imagine owning a large mansion with a huge garage full of new vehicles. Now bulldoze everything. That’s how much money you’re throwing away by not working.

Is it only about $$$?

Have you ever read the biography for someone who lived past 100? Chances are it didn’t include the phrase “never worked but saw a lot of great daytime television”. That’s because there is a strong correlation between work and overall wellness. True, employment doesn’t guarantee you good health. But don’t doubt its impact. Work keeps you active, engaged and stimulated: all key ingredients of health and happiness. Consider this:

Health

Among those who are working, 66% report that their health is very good or excellent. This drops to 58% among those who are not working.

Happiness

93% of all Saskatchewan workers claim that they are satisfied with life in general. This drops to 85% among those who aren’t working – still high, we admit, but still lower.

Relationships

59% of people who work are married. This drops to 44% among those who are not working.

Education

50% of people who work have taken some post-secondary education – either at university or technical school. This drops to 31% among those who are not working.

We’re not suggesting that anyone who doesn’t work will end up poor, single and unhappy. Still, it’s safe to say that work will increase the quality of your life. Our advice: find a career that interests you and do everything in your power to make it your own.

Find your Future!

Knowing your numbers can add up to a fun and successful career!
Having a knack for math and logic helped Dalyn Sidloski pursue a successful career as an accountant. He had the opportunity to test-drive the job for about a year and quickly decided it was what he wanted to do because he knew he would have fun on the job – really!

Why did you want to become an accountant?
It just seemed to be a natural fit for me. I have always loved math, logic and working with numbers. When I got my first taste of working in the finance department at the Saskatchewan Housing Authority a few years ago, I knew that this was an area I would enjoy. And I was quite happy to get into a climate-controlled environment after spending some time working at jobs outside during Saskatchewan’s hot summers (+40) and freezing winters (-40)!

How did you become an accountant?
I had an opportunity to get a job as an Accounting Technician for the Saskatchewan Housing Authority. After working there for about a year, I decided to enroll in the Business Administration program at the Southeast Regional College in Weyburn.

The following May, I received my certificate and won the Award for Academic Achievement for having the highest overall average. I went back to work for the Saskatchewan Housing Authority for the summer and then moved to Moose Jaw in the fall to earn my diploma in Accountancy. When I was done, I moved back to Weyburn to go back to work at the Saskatchewan Housing Authority.

Tell us about your current job.
Right now I’m the Dean of Finance and Administration for the Southeast Regional College. I’m responsible for overseeing various departments such as the Finance department, the Facilities department and the Information Technology department. I am a member of the Executive Management team and am responsible for reporting financial activities of the college to the governing Board of Directors. But I started here as an Accounting Technician before working my way up to my current position.

Industry facts:
• Are you the type of student who is good with math and likes working with numbers? Do you want to pursue a career that has lots of well-paying jobs available in Saskatchewan? You should seriously check out accounting!
• The odds of getting a job as an accountant in Saskatchewan are very good right now because they are part of a large occupational group. In 2000, there were more than 6,500 auditors, accountants and investment professionals employed in Saskatchewan. That’s a lot of jobs!
• They’re also paid very well. In 2006, financial auditors and accountants earned an average salary of $56,700 a year! That’s definitely worth adding up!
• Want a fancy business card with letters behind your name? There are three main accounting designations you can get: Charted Accountant (C.A.), Certified General Accountant (C.G.A.) and Certified Management Accountant (C.M.A.). But you’ve got to earn those letters: All three require additional course work after a degree program.

Dalyn Sidloski
Accountant
“It just seemed to be a natural fit. I have always loved math, logic and working with numbers. I knew that this was an area I would enjoy!”

What kind of education do you need to be an accountant?
For the Accounting Technician job at the Southeast Regional College, I needed a two-year diploma in a business program. I had just received my Accountancy Diploma from SIAST - Palliser Campus when I took the job. For my current job as Dean of Finance and Administration, I’m required to have an accounting designation.* I am currently working towards this designation as I was given the job based on merit and with the understanding that I would work towards obtaining the designation on the job.

What are your future goals?
My primary goal over the next few years is to continue my education and obtain my designation as a Certified General Accountant (CGA). In my current job, my goal is to take advantage of any training opportunities that become available so that I can continue to improve my skills.

What was the best advice you’ve ever received?
The best advice I’ve ever received was simply this: “Earn your pay.” Basically, it means that you should go above and beyond what is expected of you. Volunteer for everything, especially the things no one else is interested in helping out with. Perhaps most importantly, make a positive effort in all tasks set in front of you. Generally, people don’t want to hear all the reasons why something can’t be done, they just want to see results.

Dalyn’s advice: “Always do your best to maintain positive personal and professional relations with everyone you encounter because first impressions last a long time. At some point in the future, you might deal with these people again. They might become your boss, co-worker or customer, so it’s important to always be positive.”

2008 relevance 9
If you like knowing how things work, a career within the engineering field might be perfect for you! Scott Beck loves learning new things every day and says his career is very rewarding. There are many different areas in engineering you can pursue, so it pays to check them all out to see which areas you like best.

Tell us about your job.
I am currently employed with a company called Danrich Environmental Controls as a Technologist/Project Manager. My role at Danrich is to design and implement monitoring and controls for a building’s environmental system. When a project is complete it is possible to log into the building over the Internet and monitor and change the environmental controls. These controls include the temperature in a specific office or an entire building. We can also change the air pressure in a building and monitor the air quality. Not all of our projects are ‘building’ related. We also control the production of ice in large indoor arenas, control a geothermal system and more. Every job is different and has different challenges. That’s what keeps it interesting!

Why did you choose this career?
I chose my current job with Danrich because of the learning opportunities it offers. Not only do I get to use what I learned in school, but I get to learn new things everyday. I have always been interested in how things work and with electronics so prevalent in everyday items, it seemed like the right route to take. It wasn’t until I moved to Saskatoon that I was able to attend school full time and pursue electronics as a career.

What do you like best about your career?
I love the hands-on experience. Not only do I get to design and program the systems, but I also get to go out into the field and assist in the installation of the sensors and control equipment.

What do you like least?
The thing I like least about my job is the paperwork involved in managing a project. I prefer to ‘get my hands dirty’ rather than pushing paper. Fortunately, the paperwork is a small part of what I do on a daily basis.

What education did you need to enter your field?
A background in electrical engineering or an electronics diploma is the basic requirements for entering the building controls field of employment. In 2005, I moved to Saskatoon where I went to school and received a diploma from SIAST in Electronics System Engineering Technology (ESET). I had several job offers before I graduated, but I chose to work for Danrich a local Saskatoon company.

How important is education to you?
Education is paramount! An education allows you to spend your working life doing something you enjoy.

What are your future goals?
My future goals related to work are to keep learning the trade I have chosen and to successfully manage larger and larger projects. I also plan to go back to school and pursue an engineering degree.

What was the best advice you’ve ever received?
Decide what you want and set several small goals to get you there. No matter how big the obstacle, if it is broken down into smaller pieces it can be overcome.

Scott’s advice: “Don’t take a job or pick a career based on money. Pick a career based on the passion you have for the work and the money will follow. You will also enjoy your working life a whole lot more.”

Like the Science of Engineering? Check this out!
- Chances of getting a job as civil, mechanical, chemical or electrical engineer in Saskatchewan are good right now.
- You have lots of choice! Engineering is a highly diverse field. Engineers work for private organizations, public agencies, the military and non-profit organizations.
- According to the 2001 Census, the average full-time income for engineers was $58,693 per year.
- In Saskatchewan, the average salary for engineers is $77,374 per year according to a survey conducted by Insight Research Inc.
- Even more money in your pocket! 60 per cent of engineers in Saskatchewan receive cash bonuses according to a survey conducted by Insight Research Inc.
CELEBRATING ABORIGINAL ACHIEVEMENT

ABORIGINAL ACHIEVEMENT is celebrated
ABORIGINAL SCHOLARSHIP is first-rate
ABORIGINAL AWARENESS is our priority
ABORIGINAL SUCCESS is paramount

University of Saskatchewan  explore.usask.ca
Prognosis: Success! Becoming a nurse was the right choice

James Carnegie knew he wanted a career in healthcare, he just wasn’t sure about the details. Then one day it just hit him - he wanted to be a nurse! He didn’t waste any time getting started on his career and he absolutely loves it!

Tell us about your career.

I’m a Registered Nurse (RN) working part-time in Stony Rapids, which is located up north on Lake Athabasca. I run a 14-bed unit that consists of medical, acute and long-term care patients.

I also work casual hours in Emergency at the Victoria Hospital in Prince Albert. Emergency is a great place because I’m always learning new skills at a very fast pace. If you want an adrenaline rush, work in emergency!

I began my health care career five years ago as a Licensed Practical Nurse (LPN). As a new LPN, I was extremely excited and motivated. I found that surgery was a place where I felt comfortable and the patients were always interesting and challenging. With surgery, you prep the patient for surgery, and then when they come back you assess them, take their vitals and monitor them closely for the next few hours. On the surgical floor there is always a lot of dressing to do and I have a passion for wounds and dressings so I was always willing to help.

Why did you decide to become a nurse?

Shortly after high school I realized I wanted to get into health care, but I just wasn’t sure which area to pursue. Then one day a friend of mine saw me looking through career pamphlets and said, “Why don’t you become a nurse? You’re really nice and people like you.” Suddenly, it was like a light went on in my head and I knew that was what I was searching for!

What kind of education or training did you need to become a nurse?

In high school, you need to complete Grade 12 with biology, chemistry, math and English. Then you can enroll in the Licensed Practical Nursing program or go to university to become a Registered Nurse.

I started with the LPN program because my grades weren’t high enough to get accepted into the RN program. Taking the LPN program was probably the smartest thing I’ve ever done. It helped me realize what was involved in the nursing profession and decide whether it was for me or not in a short amount of time instead of taking four years of university to find out. The LPN program also gave me the skills that helped me reach my goal of becoming an RN and made the RN program easier because I already had a good understanding of the terminology, skills and anatomy.

What are the biggest challenges you face in your career?

There aren’t enough nurses in Saskatchewan so it makes the job more stressful and difficult. Also, I often hear people say, “All you nurses do is sit at the desk and read and talk to each other.” But if they could see us through our whole shift, they would see how hard we work and how we are sometimes treated. Visiting hours just happens to be the time of day when we get to sit down and do things like chart our findings, discuss care plans and call for doctor’s orders.

What’s the difference between a RN and a LPN? Which do you like better?

There are a lot of procedures an RN can do that an LPN cannot do. RN’s are in charge of the ward, which means if something goes wrong on the ward, the RN is ultimately responsible. When I was an LPN, I would usually go home smiling. As an RN, I often go home frustrated and mentally drained. I prefer the workload of the LPN.

James’s advice:

Never give up. Work hard and you will receive everything you want in life. Stay focused. Most importantly, think positively and positive things will be drawn to you.

Have a knack for nurturing others? Become a Licensed Practical Nurse!

- You shouldn’t have trouble finding a job! There is a huge nursing shortage in Saskatchewan and there will be a lot of job openings over the next five years.
- Hey guys, come join us! Most nurses in Saskatchewan are women. In 2001, less than five per cent of all nurse supervisors and registered nurses in the province were men.
- We need new recruits! In 2001, almost half of all Saskatchewan nurses were 45 years of age or older. As more nurses retire, more jobs will be available.
- Like small towns and rural areas? In 2001, about half of the nurses in Saskatchewan worked outside Regina and Saskatoon.
- In 2004 there was one Registered Nurse for every 129 people in Canada, according to the Canadian Nurses Association.

for more information go to www.relevancemag.ca
We’ve provided information about hundreds of Saskatchewan jobs. Some will be more familiar than others. Who knows? Job Chart might introduce you to a job that you have never heard of but would be perfect for. Take some time to learn more about what’s out there.

**What Does This Information Mean?**

Job Chart contains the following relevant information for each job title listed:

**Job Description**
This is merely an introduction. For more detail about job duties, talk to someone who does this for a living, or visit [www.saskjobfutures.ca](http://www.saskjobfutures.ca) for a larger profile.

**Number Emp. (2006)**
Remember, there is more turnover (and as a result, more openings) in jobs with high employment.

**Avg. Income (2006)**
This gives you a general sense of what you can expect to earn in each job.

**Training and Education Routes**
This gives you general list of Saskatchewan institutions that offer programs relevant to each job. For specific details, CONTACT THE INSTITUTION DIRECTLY! See page 28.

**Prospects to 2011**
If you are planning a career, it’s important to know what your employment prospects might be. With this in mind, we have forecast whether prospects for each job will be.

+ + + . . . Good
+ + . . . Fair
+ . . . Limited for each job.

**Education Icons**
These icons indicate the level of education you likely will need to complete before working in a given job. To work as a lawyer, for example, you will need to attend university. To work as a plumber, you will need to complete apprenticeship training.

ℹ . . . Training Typically Provided On the Job
рош . . . Job Requires University Education
рош . . . Job Requires College Education
רוש . . . Job Requires Apprenticeship Training
рош . . . Transition

The difference between Universities and Colleges is not as clear as it used to be. In fact, many of the programs that were once exclusively offered at university are now available in part at SIAST or the Regional Colleges. And this benefits students, particularly in rural and remote areas.

This symbol means that some portion of the university requirements for a job can be completed at the college level. Whatever post-secondary course you are interested in, find out what options exist by contacting the institution.

You should not plan your career without knowing what your options are.

This portion of Relevance Magazine should give you a better understanding of what these options are.

We have made every effort to ensure the information provided in Relevance is accurate. As an applicant or counselor you should check with the appropriate institution to verify information and check for changes. In some instances, the training information provided represents a starting point and additional training and/or transfer may be required to meet professional, occupation or trade requirements. University classes are available at all Saskatchewan Regional Colleges. Courses from both the University of Regina and the University of Saskatchewan, through transfer agreements, enable students to complete one or more years of full-time university study.

**Data Sources:** Job Title and Job Description: This information—and in fact, the whole structure of the Relevance Job Chart—is derived from the National Occupational Classification system (NOC). For more information on the NOC, visit www23.hrdc-drhc.gc.ca

**Average Annual Income 2006:** Wages are based on full-year, full-time employment for each occupation. Workers may earn more or less depending on their employer, location, size of company, training, experience and hours worked. Highly skilled workers may earn significantly more than the average. Wage information provided by Service Canada. For more information, visit www.saskjobfutures.ca.

**Training and Educational Routes:** This information is provided by Saskatchewan education and training institutions. This is not a comprehensive list of programs and courses. It is intended as a general guide to help you find education related to Saskatchewan occupations.

**Number Employed – 2006**

**Employment Prospects – 2011:** Data for these two columns is provided by Saskatchewan Advanced Education, Employment and Labour and Service Canada. It is derived from the 2007 Saskatchewan Employment Forecast (SEF). For more information on SEF, visit www.saskjobfutures.ca.

We have made every effort to ensure the information provided in Relevance is accurate. As an applicant or counselor you should check with the appropriate institution to verify information and check for changes. In some instances, the training information provided represents a starting point and additional training and/or transfer may be required to meet professional, occupational or trade requirements. University classes are available at all Saskatchewan Regional Colleges. Courses from both the University of Regina and the University of Saskatchewan, through transfer agreements, enable students to complete one or more years of full-time university study.

The Job Interview: What NOT to wear!

Resumes are about getting employers to notice your skills and qualifications. Now that you’ve got their attention, they want to have a closer look at you. Literally.

Yup, it’s interview time. Depending on the job, employers will receive literally hundreds of resumes. To narrow the field, the person doing the hiring quickly scans the pile for the best prospects and the ones who make the cut get the call.

**Hot tip:** If you have a voice mail or a machine, don’t have a rude or overly casual greeting. If an employer calls and hears “Hi, uh, I’m not in — you know what to do,” they might just hang up and never call back.

**So, what to wear?** Dress as though you’re reporting for work for real. That’s not to suggest that, if you’ve applied to a burger chain, that you rent a uniform and wear that (if you did, they’d think you’re obsessed or worse). Just use your head.

**Why is what you wear important?** Because you’ll be judged on it — your interview clothes say what you’re prepared, reliable, professional and eager to represent the company. When you wear something ridiculous like, say, ripped jeans and an oversized Marilyn Manson sweater with food stains on it, it’s a sign that you:

a) don’t have the first clue about the job
b) don’t have any respect for the person or the company doing the hiring

If your hair is so brightly coloured that tropical birds want it for a mate, tone it down. A lot. Wear hair in a boring, tidy style either up or down. Guys — ditch the faux-hawk for the day. Wash, comb, pat into place — repeat as necessary.

**Skin, make-up, nails:** An interview is not a date so throw cold water on any impulse to make yourself look hot. Clean skin and less-is-more make-up is much more attractive than layers of…stuff. Nails? Neutral (nothing glitter, patterned, or weird like blue or green) polish and, guys too, clean underneath. It’s truly “yuck” to have dirt under your nails.

**Clothing:** Dress to fit in to the workplace in question. If the employer makes people wear uniforms, wear a plain shirt with pants or a skirt. Wear party hose with skirts (always) and wear low or no-heeled shoes — never runners, open toe shoes or sandals. That stilettos should never be worn is a given but in case you’re wondering, the short answer is, and always will be “NO.” Runners? See word in quotation marks in previous sentence. What if employees get to wear jeans? Well, do you work there yet? Then you’re not an employee and don’t get to follow their dress code! That goes for interviews on Friday’s — casual Friday does not apply to you. What if it’s a trade-type of job? Okay, fair question. Wear a plain shirt and khaki’s or cords at the very least.

**Colour:** Stick to neutrals like brown, beige, black, white and navy. These are good in any workplace.

**Never, never, never**
- Drench yourself in scent. Again, this is not a date; you’re not trying to seduce your potential employer (at least we hope not!). Plus, a lot of people are allergic to fragrances. Giving your interviewer an instant migraine or nausea will make you memorable — but not in a good way!
- Wear a lot of jewelry. An engagement band, school ring or one or two pieces, max, of small jewelry is the limit. In food and trades, you shouldn’t wear bling anyway so leave it out.
- Fidget, pick at your face or squirm around in your chair. If you’re acting restless, that’s distracting and the interviewer still start to wonder about your attention span or whether you really want to be there at all. Picking at your face is just gross — we all do it when we’re nervous but try, try not to during the interview!
- Wear club or workout clothes. It’s ridiculous and, worse, disrespectful. The employer doesn’t care what you wear on your own time and they’re not interested in providing you with an environment to express inner-rapper through fashion.
- Chew gum or suck on candies while talking. It sounds terrible and looks even worse.
- Wear hats, unless your faith requires that your head be covered. If you’re having a bad-hair day, a hat is not the answer.

**Always, always, always**
- Give yourself plenty of time to get ready. Don’t rush. Pace yourself and stay calm.
- Wear something comfortable. You may have to wait or the interview could take a while so choose clothes that ‘sit’ well.
- Check your clothes for marks, stains and spots before you get dressed.
- Sit up straight. It makes you look taller and confident. Good posture also makes your outfit look crisp and tidy instead of all bunched in the middle.
- Smile. You’re looking good so add to the overall look with an awesome smile.
- Bring breath spray or mints. Most mints dissolve quickly but pop it about five minutes before you get to the interview so that it’s all gone by the time you have to speak.

**Don’t have interview clothes?** Your friends or family might lend you some of theirs if they’re about your size. Also, never underestimate the awesome power of the VV Boutique (aka: Value Village) to provide instant wardrobe remedies for very little cash. You may have to dig for a while, but you’ll find pants, shirts and skirts that are perfectly appropriate.

If you love helping people and want a career where you can really make a difference in someone's life, social work is the career for you! That's why Janet Lemaire became a social worker when she found out she had to make a career change due to an injury. She says being able to help people manage their issues on their own is what makes her career so rewarding!

Tell us about your job.
I am currently working in a term position at the Yorkton Mental Health Center as a Mental Health Social Worker. I'm in the Adult Services Department and a Rehabilitation Day Program.

Why did you choose to be a social worker?
I had been working for nine years as a Special Care Aide in a long-term geriatric facility when I injured my shoulder. After repeated surgeries, my surgeon told me that it would no longer be safe for me to perform the heavy duties that are required of an Aide. To be honest, I was very devastated and spent many months scared and confused of what to do with the rest of my life. I went to the Parkland Regional College and talked to a career counselor about my options. I discovered that what I really loved about my job was the interaction with the residents and being able to provide a necessary service. This is when I found out about the Social Work Degree program that was being offered here in Yorkton. It was the perfect opportunity as the career was a great fit for me, but more that, I could take the entire course right here in Yorkton. I found myself going back to school when I was 34 and married with two young children. Going to school at home allowed me to be with my family and kept my expenses down. The support of my family and financial savings was a tremendous help towards my success!

What do you like best about being a social worker?
I know it may seem like a very over-used answer, but I really want to be able to help people. All of us have experienced periods in our lives when we were scared, lost or unsure of what to do about our issues. Going to a counselor can help us to learn better coping skills and learn how to empower ourselves to work through these issues. It's a very powerful moment when a client is able gain the strength and knowledge to help him or herself. It's moments like these that make this career so exciting.

What do you like least?
As with any issue or problem, there are often no easy answers and sometimes clients get frustrated that there is no “quick fix.”

What education did you need to enter your field? How important is education to you?
To receive a BSW in social work it will take a person about four years of full time studies. However, your education does not stop there. The real learning is done on the job, as experience is priceless. However, education is very important to me and my future career as there is always something new to learn. The more we learn the better armed we will be to help others who have a variety of service needs. I don’t think I’ll ever stop learning. I think I have caught the education bug and am excited to learn whatever I can!

What are your future goals?
I would love to go back to school and get my Masters degree, but for now it’s the experience that I’m after.

What was the best advice you’ve ever received?
I was once told to take a good hard look at what I wanted out of life and then decide how to get there. After all, things don’t happen until we make them happen! This came from a good friend and mentor.

What advice do you have for young people?
I’d advise the exact same thing. Don’t sit back and wait for things to happen to you. Decide where you want to go in life and create a plan to make those goals happen. Besides that, for those mature students out there, it’s never too late to get started!

Do you see social work in your future? Check this out!
- The chances of getting a job as a social worker in Saskatchewan are good right now.
- About 60 per cent of social workers in Saskatchewan work in the health care and social assistance sector.
- Social workers can be found in family services agencies, children’s aid agencies, general and psychiatric hospitals, school boards, correctional institutions, welfare administration agencies and federal and provincial departments.
- Social workers provide services on a one-to-one basis with clients or as members of a multidisciplinary team.

LAKELAND COLLEGE

A place that’s right for you

We have undergraduate programs in Arts, Business Administration, Education, Engineering, Fine Arts, Kinesiology and Health Studies, Science and Social Work.

Our Aboriginal Student Centre is a link between Aboriginal students and the many student services offered at the U of R. It will help you make a successful transition to University life and help you to realize the achievement of your educational goals.

We offer many scholarships and bursaries, including targeted scholarships for Aboriginal students like the CIU Aboriginal Bursary, the Dr. Lloyd Barber Scholarship and more.

The Aboriginal Career Centre helps students find career-related work through work placements, internships and summer employment. We have developed and implemented a Co-operative Education Program, Full Circle Summer Internship Program and Job/Graduate Registry. It is a great way to connect with employers, gain work experience and ultimately find a rewarding job.

Cooking up a Career in the Kitchen
Lance Lafonde loves to cook. He grew up around a great cook - his mom - but it was one of his own meals that inspired him to pursue cooking as a career. Knowing he could make other people happy with his meals is what made him commit to the kitchen!

Tell us about your job.
I am a red seal chef, which means I’ve completed the required three years of schooling, including an apprenticeship under the supervision of other red seal chefs. I am currently a café manager at the Saskatchewan Indian Institute of Technology in Saskatoon and have been here for the last four years.

Why did you choose to be a cook?
It all started at home. My mother is a great cook and baker, so some of her skills rubbed off on me! But the moment I knew for sure that I wanted to cook was the time I caught some pickerel when I was at the lake. I cleaned and filleted the fish and then pan-fried it over an open fire. At midnight I had people coming out of their tents wondering where the smell was coming from. I must have fed about 15 to 20 people that night. They said it was the best fish they had ever had! It made me feel so good to know that I was able to make others happy with my cooking.

When did you know you wanted to pursue this career?
I had been cooking since I was 15 years old in different restaurants in Saskatoon. When I was 18, I was working at this one restaurant along side this older gentleman. He told me not to be like him. He said to go and get my red seal paper so that I could be a chef.

What do you like best about being a cook?
The best part of my career is that I don’t have to work outside in the winter. It’s always nice and warm in the kitchen and in the summer I am in the air-conditioned buildings. Another part I like about cooking is that, in this day and age, computers are taking over a lot of jobs that people used to do. I would like to see a computer cook a catering function for 300 people! People will always need to eat so I would think that I would always be employed.

What do you like least?
You’re always cooking on holidays. When everyone else is out enjoying Mother’s Day lunch with their mothers or Christmas supper with their family, guess who’s cooking? You are!

What are your future goals?
My future goal at this time in my life is to start an Aboriginal cooking program for First Nations people who also have a love for cooking. I’d also like to open my own restaurant.

What was the best advice you’ve ever received?
I feel that I’ve received two good pieces of advice during my early years of cooking. The first was to attend a post-secondary course in your chosen field. You need to make yourself creditable in order to excel in your career. Secondly, your friends don’t pay the bills, you do! Remember that when you have a Friday night shift that you’re scheduled to work and your friends want you to call in so you can go and party with them! That is when my advice comes in handy. Stay focused on your goals.

“Be your own person. Don’t be a follower. Quit thinking that what you see on television is real life! Find what you are good at and then give it 110 per cent. Also, be good to one another.”

Cooking as a Career? Check it out!
• We all need to eat! The employment prospects for cooks are good in Saskatchewan as they are part of a large occupational group.
• Already know how to cook? You should still get formal training! Cook is a designated trade in Saskatchewan. In order to become a certified cook, individuals in Saskatchewan must apprentice for three years under a certified trades person and complete 24 weeks of in-class technical training. Certified cooks are often more employable than cooks or chefs who receive on-the-job training.
• Cooks work in restaurants, hotels, hospitals and other health care institutions, central food commissaries, educational institutions, aboard ships and at construction and logging sites.
• You might need to work in a couple of kitchens. Most chefs and cooks in Saskatchewan are employed part time – only 40 per cent were employed on a full-time basis in 2000.
Imagine the Possibilities

At Southeast Regional College, you have the opportunity to:

- Choose a personal experience through small class sizes
- Choose from a variety of programs with flexible learning options
- Access scholarship, bursaries and awards for SRC students
- Discuss career & education options with our counsellors

Southeast Regional College offers high quality, affordable education in a supportive environment. Take the opportunity to access education and training right in or near your own community.

Campus Locations:
Weyburn, Estevan, Assiniboia, Whitewood, Moosomin, and Indian Head.

Find out more about your career possibilities at www.southeastcollege.org

Northlands College can help get you where you want to go.

Northlands College offers programs throughout northern Saskatchewan, with student residences in the main centres of Buffalo Narrows, Creighton and La Ronge.

Programs range from apprenticeship and trades-related training to university studies, technical training for employment in the mining and oil sands industry, to health and community service courses.

Northlands College counsellors can assist you in planning a career that suits your interests and aspirations. We have the right course for you, right here in the north. Contact us now!

Kristopher Bailey
Machinist

“Even though I now have my journeymen ticket as a machinist I still do not see myself as having completed my training. Education is not a destination. Learning is a way of life!”

How important is education to you?
Education is very important. Without the passing on of knowledge from those who have gone before us we would have to relearn everything over again by ourselves; A very costly idea. There are enough undiscovered things to learn already without having to reinvent the wheel. Even though I now have my journeymen ticket as a machinist I still do not see myself as having completed my training. Education is not a destination. Learning is a way of life!

What are your future goals?
I am currently working on starting up my own machine shop in the Gravelbourg area. This has been possible for me to do through the Self-Employment Program offered through the Can-Sask Moose Jaw Career & Employment Centre and the South Central Community Futures Development Corporation. This program is giving me the training in business operations that I need in order to start and run a business. The people involved in administering this program are extremely helpful and are always there to answer my questions and to guide me through many of my business decisions.

What was the best advice you’ve ever received?
You never will know what heights you’ll reach until you push yourself to find out. No one else can do that for you.

Kristopher’s advice:
“You’re future is wide open. Choose your path in life carefully and be wise about which doors you enter through. Many are not of any benefit to you and some will even destroy your life. Only choose the doors that are a benefit to your country, your community, your family and yourself.”

Think this might be a perfect fit for you? Check this out!

• It’s a safe bet: The employment prospects for machinists are good in Saskatchewan.
• Get your training! Machinist is a designated trade in Saskatchewan. To become certified, you must complete a four-year apprenticeship under a certified tradesperson and complete 30 weeks of in-class technical training.
• Mostly men… In 2001, 90 per cent of all machinists and machining and tooling inspectors was male.
• Think this might be a perfect fit for you? Check this out!
• Make machines, make a good living! In 2006, the average full-time income for machinists and machining and tooling inspectors was $42,500.
• Machining has become increasingly computerized. Machinists now set up and operate both hand and computer numerically controlled tools to perform precision operations, such as turning, milling, boring, planing, drilling, precision grinding and other operations.
• Most machinists work for an employer. Only about 6 per cent of the machinists across Canada are self-employed.
• Most machinists work for an employer. Only about 6 per cent of the machinists across Canada are self-employed.

Getting it just right: building machines takes precision and accuracy.
Kristopher Bailey has to make sure every machine or machine part he makes is just right. As a machinist, he has to make sure everything he builds is a perfect fit – and that’s pretty much what this job is for him. As a person who likes to work with his hands and take pride in his work, becoming a machinist was the perfect career choice.

Tell us about your job.
A machinist is a person who uses tools and machines to make other machines or parts for machines. These parts are made by cutting the material, which is usually metal, into a desired shape and size. This size will often be to within a tolerance of plus or minus 0.001 of an inch of the desired size. That’s within a target size of half the thickness of one of the hairs on your head! However, the tolerances that I work to are typically designated by a blue print and may range from an eighth of an inch to tolerances so small that a change of 5 degrees Celsius can seriously throw off a measurement. You must have a good understanding of the materials that you work with as well as the methods and tools that you use to shape the material into the piece that you are making. Parts can be almost anything from a simple shaft to a much more complex set of beveled or helical gears. Using the machines of my trade can be very dangerous if you are careless or inattentive. Having a thorough knowledge of how the machine works and how it is used as well as following safety procedures and using common sense will greatly reduce the risk of being injured in this trade.

Why did you choose to be a machinist?
I based the decision on my personality, my love of making and building things and my interest in machines. I enjoy working with my hands and challenging my mind at the same time. I am never satisfied with just doing a satisfactory job. My work has to be done well and it has to be done correctly. I use mathematics frequently and apply my skills and training every minute I am on the job. My work can be very demanding at times but it also comes with the satisfaction of knowing that you can make something precise and sometimes even quite intricate.

What education did you need to enter your field?
I needed my Grade 12 to be able to enter into the Pre-employment program at SIAST. The Pre-employment program was very beneficial to me because it allowed me to learn a lot of the basics of my trade as well as it prepared me to enter into the industry.

Resume TIPS

Keep it simple! Tips on writing your resume

Remember that scene in Legally Blonde when Elle Woods hands her resume to her law professor? “It’s pink,” he says, then adds “And it’s…scented!” “Smells good,” says the prof’s assistant. Ahhhh…Hollywood.

While Elle Woods demonstrated how we can overcome other’s perceptions of us, she’s not a great role model when it comes to resumes.

If you’re serious about getting a job, coloured and — heaven forbid — scented paper, isn’t something that’s going to impress your future boss. What it will likely do is provide a few minutes of amusement while the manager passes it around the office for a laugh before putting on the “not a chance” pile.

Your resume can and will land you interviews if you prepare it right.

Here are some tips:
- Use regular, white, every-day paper.
- Put your mailing address, telephone number and email address at the top.
- List the jobs you’ve had starting with the most recent.
- Same thing goes for education — start with your current or most recent education and work backwards from there.
- Keep it short — two pages maximum. Only have enough for one page? That’s fine — better short than way too long.

Never, Never, Never
- Put your photo on the resume — unless the job is modeling or acting, it’s usually not a good idea.
- Use coloured, patterned or textured paper — it’s not interesting or cool, just silly.
- Use fancy or decorative type — it can be hard to read and can look messy. Pick one kind of type and stick with it.
- Use really ridiculous, fancy words. ‘Curriculum Vitae’ and ‘Resume’ mean the same thing. Simple works better every time.

Always, Always, Always
- Spell check! — nothing says “not qualified” like typos and spelling mistakes.
- Tell the truth — employers will check out your info and you’ll be so busted if it’s made up.
- Prepare a cover letter — it shows initiative. Make a new cover letter for each job you apply for.
- State why you’re interested in the job and why they should hire you. Don’t just list your skills — that’s already in your resume.
- Ask for the manager or a supervisor when you drop your resume off. That shows that you’re serious about a job and that you want someone with hiring power to look at it.

There are lots of good books and online resources that will show you excellent examples of resumes. You can also get ideas from other people’s resumes. Ask your parents, siblings and friends to share their resumes with you and help you prepare yours.
Carolyn Chicoine
Oil & Gas

“I never thought that it was really an opportunity for a girl, but I’ve done it and I’m quite proud that I have!”

How did you know you wanted to work in the oil patch?
I went to university right out of high school, but I wasn’t completely sure of what I wanted to do. I took arts and science to begin with and decided to be an elementary teacher. I finished my bachelor of arts, majoring in English. I had another two years, after degree program to become an elementary school teacher, I decided to get a job for the summer months before going back to school. My dad told me to get the safety tickets that would allow me to work in the oil patch because he said there was a lot of opportunity there. During my week of safety courses, a job opportunity came up as a roughneck on a Big Sky Drilling rig, so I took it. I was hooked right away! I never did go back to school to become a teacher.

What education or training did you need to work the rigs?
I’ve moved up on the rigs and have been a motor hand for almost two years. I work for Big Sky Drilling, which is bringing in a rig technician program. The Rig Technician Level One course covers the job of a motor hand on the rig. This was the first level offered to us. Derrick hands will be next and then drillers after that. All the courses are a part of the apprenticeship program that they are forming within the oil patch. These rig tech courses are good because they cover main aspects that a person has to deal with in their job. You can never be educated enough. There is always room for learning!

What are you future goals?
I would like to continue working rigs as long as I can. I would like to continue moving up. I think it would be really cool to be a driller some day. There are not many girls on the drilling rigs, so I would like to get as far as I can on them just to show that it can be done!

Carolyn’s advice: “There are so many different kinds of career opportunities out there and so many different kinds of people. There is something for everyone out there, it’s just a matter of deciding what you like. I believe you can do anything you set your mind to. You’ve just got to stick to it.”

Drilling is her dream job!
She went to university to become a teacher, but a summer job in the oil patch changed everything. Carolyn Chicoine just planned on making some extra cash, but she loved the job so much she immediately decided to change directions! Now she spends her days on the rig and absolutely loves her job. It just goes to show that you might find happiness and success pursuing a career that isn’t always the obvious choice.

Tell us about your job.
I’ve worked the rigs now for two and a half years and I really enjoy it! I definitely plan to stick with it. As a kid, I grew up with my dad and two brothers in the oil patch and I always thought it would be cool to be a part of it too. I just never thought it was really an opportunity for a girl, but I’ve done it and I’m quite proud that I have!

What do you like best about your job?
I like working rigs because I like to be outdoors and I like working with the guys that I work with. I enjoy the physical work for the most part. The paycheck that comes along with the rig job is definitely an added bonus. Because of the money, I have been able to buy my hometown bar. I’ve got it up and running now and I’m back on the rigs.

What are some of the challenges you face working in the oil patch?
The rig life is definitely not for everyone, but I really do enjoy it. It’s a very physical job and you’re always working outside. I would rather work outside in this environment than be stuck inside. The weather is one thing that a lot of people might struggle with because you have to work whether it’s plus 35 or minus 45 degrees. You’ve got to dress for the weather, that’s for sure! I don’t mind the cold temperatures so much, but I do sometimes struggle with the heat. At least when its cold you can put more clothes on, but in the summer you still have to wear your coveralls and all of your safety gear. There is nothing I really hate about my job. It does get stressful at times, but what job doesn’t?

Think this might be for you? Check out these facts!
- There’s good cash in oil and gas! In 2006, the average full-time income for oil and gas well drilling workers and services operators was $55,000 per year. The average full-time income for oil and gas well drilling and service supervisors was $69,000.
- Like living in rural areas? Jobs for mine service workers and operators in oil and gas drilling are concentrated in rural Saskatchewan. In 2007, only 14 per cent of the jobs for these workers were based in Regina or Saskatoon.
- Yes, it’s mostly men. In 2001, 98 per cent of all mine service workers and operators in oil and gas drilling in Saskatchewan were male.
- About 300 oil and gas companies operate in Saskatchewan.
- In 2006, there were 2,139 wells drilled in the province. That’s well above average drilling levels!
- About 18 per cent of Saskatchewan’s production is used within the province.
- Saskatchewan is the world’s largest potash producer and exporter. We supply 33 per cent of world demand!
- Saskatchewan’s first commercial crude oil discovery was made in 1944.

Apprenticeship is a process of skills training where a person—called an “apprentice”—learns the skills of a trade on-the-job and under the supervision of an expert—called a “journeyperson.” This is an “earn while you learn” system of building a career with 50 trades to choose from in Saskatchewan.

Apprenticeship training is on-the-job training combined with theoretical, technical training. The apprentice spends approximately 85 per cent of their time learning the knowledge and skills of the trade on-the-job, while earning a wage. About once per year, the apprentice spends a few weeks learning theory in a technical institute that reinforces the knowledge and skills taught on-the-job.

Apprentices must experience the broad range of skills in the trade, work the prescribed number of hours on the job, and successfully complete all levels of technical training, before being eligible to write the journeyperson exam. A journeyperson certificate is the foundation for many career opportunities from manager to instructor to entrepreneur. Explore your career opportunities in the skilled trades today!

What are the steps to become an apprentice?

1. Find an employer willing to provide the necessary on-the-job training and supervision.
2. Sign an apprenticeship contract with the employer and register it with Saskatchewan Apprenticeship and Trade Certification Commission.
3. Work and learn on the job for the required period.
4. Submit your hours of work (trade time) to the SATCC every few months.
5. Attend technical training for the required number of weeks each year when notified by the SATCC.
6. Pass your technical training.
7. Upon successfully completing the apprenticeship program and passing the certification exams, the apprentice receives a Certificate of Completion of Apprenticeship and a Journeyperson Certificate of Qualification! Congratulations, you are a professional journeyperson now!

What education do I need to become an apprentice?

Employers usually prefer to hire workers who have completed Grade 12. While academic requirements for entry into the trades are no longer related to high school grade level, high school completion will ensure entry into the trade. For specific requirements for each trade, visit www.saskapprenticeship.ca.

Can previous work experience count toward my apprenticeship?

You bet! If you have been involved in the Saskatchewan Youth Apprenticeship (SYA) program, or some other trades program through your high school, you may receive advance standing in that trade when you register as an apprentice. Contact an SATCC office in your area to learn more.

For more information, see the Saskatchewan Apprenticeship and Trade Certification website at www.saskapprenticeship.ca or call 1-877-363-0536.
Tap into that spark! Find a great career in welding

Regan Crush is the kind of guy who likes to work with his hands and do things outdoors. He’s always enjoyed working on engines and building things out of metal, so becoming a welder seemed like an obvious career choice. If this sounds like you too, you might want to seriously consider a career in the trades. There are tons of choices – becoming a welder is just one option!

Tell us about your current job.
I’m a welder at Mifab Manufacturing Inc. in North Battleford, building interceptors. I have my third year card and am working toward my Journeyman Certificate. Prior to Mifab, I was building retaining walls for oil drilling sites, legs to hold up the walls and D-foamers that were inserted into the oil tanks. My first welding job with Sad Sacks Welding offered a very wide variety of work, like doing machine repairs and fabricating.

Why did you choose to become a welder?
I chose to become a welder because of the influence of my high school welding instructor, Gerald Nickel. Mr. Nickel saw that I had a natural ability in welding and encouraged me throughout high school. I spent most of my lunch hours and after school in the welding shop perfecting my skills in order to compete provincially in the Skills Canada competition. I ended up winning gold in Saskatchewan and traveled to Halifax for the national competition where I won silver!

What do you like best about your career?
I enjoy the hands-on work and knowing that I have built something of good quality and workmanship. I am able to apply my trade to my own needs. I’ve built two utility trailers: one for snowmobiles and the other for quads. I also do various projects for friends and others.

What are some of the challenges you face on the job?
I don’t like the toxic fumes that some metals give off and the effects it has on my eyes and skin. The length of your career in welding can also be affected by your age, requiring a change in career later on in life.

What education did you need to become a welder?
Grade 10 is the minimum requirement to enter the welding trade as an apprentice wanting to take pre-employment welding. But it is just the minimum! I completed Grade 12 and took pre-employment welding levels one and two at the local college because it provides way more opportunities.

How important is education to you?
Grade 12 is essential because it will offer more opportunities to advance from being just a welder to a business owner or a weld inspector. To me, education is very important and I can see that more education will be required if I choose to start my own business.

What are your future goals?
First, I want to obtain my Journeyman Certificate, B-Pressure Certificate and CWB (Canadian Welding Bureau) certification related to structural welding. I would like to run my own welding truck and one day operate my own business. I also intend on obtaining my Class 1A driver’s license.

What was the best advice you’ve ever received?
The best advice that I ever received was to keep working hard even though things might not be going your way. Be patient, keep trying and you will succeed!

Regan’s advice: “If you are considering this career protect your eyes because you only get two of them. Welding is not an easy career and you have to be dedicated and motivated to succeed and better yourself in the trade.”

Industry facts
- Are you good with your hands and like building stuff? Try a career in the trades! Welding is just one of many options available – and there are lots of jobs out there for experienced welders!
- Your chances of getting a job as a welder in Saskatchewan are pretty good as they are part of a large occupational group. Plus, there’s a shortage of specialty welders – so they need you out there!
- Want to be your own boss? More welders are becoming self-employed these days.
- Earn while you learn! People who want to become certified in this trade must apprentice for three years under a certified tradesperson and complete 23 weeks of in-class technical training.
- It’s mostly men – but women can weld too! In 2001, about 98 per cent of all welders and soldering machine operators in Saskatchewan were male.
- About half of the welders in Saskatchewan work in the manufacturing industry.
- According to the Construction Sector Council, the average age of a Saskatchewan welder in 2006 was 37.

What are Scholarships All About Anyways?

Depending on the award, they are meant to help students achieve their goals in school by providing financial assistance. Each scholarship has a different background. For example, the Poundmaker scholarship was created by the descendents of the great Chief Poundmaker. He was a key figure in the signing of Treaty Six in 1876 and he fought for fairness in the implementation of the treaty. Pretty cool, eh? Scholarships are also provided by different families and organizations to show appreciation to post-secondary institutions and students. All in all, they are a way of telling students that if they really want to follow their dreams, there's help.

How Do You Get Them?

Financial awards are given to students for many reasons depending on areas of expertise and interest. Some tips on getting in the game:

- Apply for them!
- Have proof that you are goal-oriented and motivated in school.
- Ask anyone you respect to write you a letter of recommendation (which is simply a short letter telling the decision-makers how great you are!). They could be a teacher, boss or a good friend.

Although the terms may sound intimidating, scholarships and awards are easier to obtain than you think. You don't have to be a straight-A student to apply. In fact, as Yvette Arcand from ITEP stresses, “Students are so doubtful of their chances that they don't even apply. What happens in many cases is an award will only receive one or two applications, automatically making those applicants the winners!” Randy can relate and says, “I always thought that I didn’t have a chance until I became so concerned about paying back student loans that I was determined to try anything. Now I think that I went through all these years of school not even trying to apply! I wish I could turn back time.”

There are so many scholarships available that he applied for more than 20 during the summer months. Many are for Grade 12 students planning to attend post-secondary so don't think they are just for older students. You often have to provide an essay and reference letters from non-family members. Just ask your school counsellor, teachers or parents for help with editing or ideas. Each application varies, but the main theme is finding the most motivated candidate. They all have deadlines, so don't procrastinate!

So, what is Randy going to do with all his money?

“Pay off my student loans and pimp my ride...or at least wash it for once!” With that kind of cash, he’s really living!

And the Winner Is...

Randy Morin was speechless. As a 3rd year student in the Indian Teachers Education Program (ITEP) at the University of Saskatchewan, he had struggled to make ends meet each year, relying on student loans to pay tuition and rent. But now he has more than $4,000 of free money in his pocket received through three scholarships.

Every year students prepare for post-secondary education. Of course, one major source of stress is finding cash to pay for tuition, food, bills, transportation and rent. We all need to get by and it's especially challenging as a post-secondary student. Hopefully, there's help available from your family, job, student loans or other programs, but that's not always the case. That's why there is one great option that is often overlooked: scholarships, bursaries, and grants.

Randy had no idea that this way of getting money was possible for him. Information on scholarships, bursaries and grants is not always readily available. “I just ran into an old buddy of mine this summer and he told me that he had received a scholarship for school last semester,” said Randy. “I asked him how and he gave me some websites and phone numbers and I was on my way to applying like crazy!”

As the weeks went by, he waited by the mailbox and received rejection letter after letter. This began to confirm his initial feelings of doubt. That all changed when he received a letter from the U of S telling him that he had won an award. That was followed by another award, the Chief Poundmaker Scholarship. Finally, upon browsing through their website, he saw his name in the National Aboriginal Achievement Awards winners section for a $3,000 reward.
Careers, dreams, opportunities.

Saskatchewan’s booming economy is creating opportunities in every corner of our province. We’ll be with you every step of the way as you build the career of your dreams.
