Saskatoon Industry Education Council

A bridge between industry needs and youth interests
When we first published Relevance, Saskatchewan was just on the tip of an economic boom. Since then, we’ve become one of Canada’s “have” provinces – our economy is stronger than it’s ever been and there are more job opportunities for young people than ever before.

You’re part of a new generation; the way you work, the jobs you work at and the skills you build are very different from your parent’s generation. But with so many career choices, and with the cost of education going up, it might seem more of a challenge to find the right career path. Relevance helps open the door to possibilities. Use the Job Chart in the middle section. It highlights a wide range of careers, along with the post-secondary institutions that can help you get there. Determine your talents, your skills, your interests and in doing so, discover ways to combine these with career opportunities that will continue throughout your lifetime. Appreciate and value each experience along the way.

Our theme this year is Exploration, Navigation, Destination. We’ve profiled ten up-and-coming young people whose career paths illustrate a simple fact – the road to a career can take unexpected twists and turns, but then, that’s half the fun! Never be afraid of the journey.

Relevance magazine is produced by the Saskatoon Industry-Education Council. We would like to thank Cameco Corporation, the Saskatchewan Ministry of the Economy, Ministry of Education and our post-secondary institutions for their long-term support. We would also like to acknowledge the individuals who help make Relevance a reality. Thank you to Janet Uchacz-Hart and Shana Stewart (Saskatoon Industry-Education Council), Ministry of the Economy (Job Chart), Chad Hein (designer), Bev Fast (editor), Lee Reaney (contributing writer), Red Storm Image (photography) and Mike Klein of Meshy (website development). Sincere thanks to the SATCC, our regional colleges, universities and businesses for their financial assistance and provision of materials. Last, but never least, thank you to all the individuals who shared their stories as peer profiles in this year’s publication.

Welcome to Relevance 2013!

Win an iPad MINI!

Relevance Magazine is launching a new website and to celebrate we are giving away an iPad Mini!

For your chance to win, visit www.relevancemag.ca/contest and tell us how you would use the iPad Mini in your career planning.

Contest ends March 31st, 2013. The winner will be selected by random draw.

Be sure to visit the site over the coming months for regular posts about job prospects, quizzes about your skill-set and links to great career planning sites. Enhance your planning for the future.

www.relevancemag.ca/contest
Deciding on a career is a big decision. You might know exactly what you want to do and the kind of education you need to do it. You might just have a general idea, like a career in the trades or in business. Then again, you might have no idea what you want to do. Wherever you are on the spectrum is okay, because the post-high school stage of your life is all about exploration, navigation, destination. 

You guessed it … it’s all about the journey.

“Personally, I don’t think you should decide in Grade 10 what you want to do. At that age, I think it’s more important to know how you learn, what you like and don’t like. You need to focus on your interests, then write down some goals so you have something to strive for.”

Ryan Christmann
Agriculture Technician, Service Manager
The journey so far has been an interesting one for Anne-Marie Howie. As a journeyperson electrician, she navigates the day-to-day challenges of being a woman in a non-traditional occupation. “For the first few years I was working, people would ask if I was the wife or girlfriend on a job site. It was weird. Mostly, I shrug off the negative stuff because I’ve also had a lot of positive feedback,” she says. “People are slowly, slowly getting used to the idea. You just have to earn people’s respect, and you do that by doing good work. The only thing I can do is keep getting better at my job, keep proving myself.”

“I have to remember that I’m on the frontline of women in the trades.”

Anne-Marie Howie

Once you’ve reached your destination, don’t be surprised if your brain immediately starts planning another journey. Aaron Starr has achieved his ambition of being a lawyer, but he’s already looking ahead.

“My long-term goal is to be a partner at McKercher, the law firm where I work. My future could include politics. I also enjoy being a father. I’ve been married for four years and we have a two-year old daughter, who’s my pride and joy. I see myself encouraging her in whatever she wants to do, and teaching her the principles my parents taught me. Wherever I end up, I will hopefully continue to be a leader and a positive role model to my younger generation.”

Exploration, navigation, destination will be a recurring theme throughout your life. It doesn’t mean your life will be in constant upheaval, or that you won’t enjoy stability. It just means that opportunities and ideas will always be presenting themselves.

Tim Lewis loves the challenge of new ideas, new projects. In 2005, he started an online clothing company while he was still in second-year Commerce. In the years since then, he’s earned his degree, auditioned for the Dragon’s Den (his segment wasn’t selected for airing) and started a marketing consulting business with a First Nations focus. He recently relaunched his Tansi Clothing business with an expanded product line and a more global focus.

He admits he’s made his share of mistakes over the years (“that’s how you learn what not to do”), but he loves the challenge of creating his own work environment. “I can choose who I work with. I can dress in jeans and work on my laptop at Starbucks. Being self-employed gives me more freedom, but it’s not easy. You have to be willing to get out of your comfort zone. If you don’t scare yourself, you don’t grow.”

John Desjarlais Jr., a mechanical engineer at Cameco’s Key Lake operation, started his career journey as a radiation and environmental monitoring technician. He liked the job, but as he got more experience, he also grew more confident.

John Desjarlais, Jr., a mechanical engineer at Cameco’s Key Lake operation, started his career journey as a radiation and environmental monitoring technician. He liked the job, but as he got more experience, he also grew more confident. At 25, he enrolled in the mechanical engineering program at the University of Saskatchewan.

“Engineering is an intense program, and one of the most difficult things I’ve ever done,” John says. “I worked really hard, but I also learned how to get help. Being at university taught me how to learn, adapt, push myself. And the things I learned about myself surprised me. For example, I learned I was very capable of responding to challenges. It was enlightening and empowering.”

“One of the ways I dealt with feeling alone at university was to get involved in student politics. I was a big part starting the Northern Administration Students Association (NASA), a student group that helps with successful integration into post-secondary life.”

John Desjarlais Jr.

for more information go to www.relevancemag.ca
You’ve all heard about workplace accidents. And you’ve probably all thought exactly what most everyone thinks when they’re young – it won’t happen to me.

Feeling invincible is one of the great things about being young. It’s not a bad thing; the bad thing is ignoring your gut instincts. You know, that little voice inside that says, ‘I’m not comfortable’ or ‘this doesn’t feel right.’

“Adults tend to think that young people don’t know what to do or don’t know what questions to ask, but I think a lot of times they do,” says Curtis Weber, a spokesperson/trainer with the Saskatchewan Workers’ Compensation Board (WCB). “Kids know when they’re feeling uncomfortable, it’s just they don’t always feel comfortable speaking up.”

Curtis travels the province talking with young people about workplace safety, and he speaks from experience. “I was that kid in high school: a risk-taker, a nothing-bad-is-ever-going-to-happen-to-me 17-year old.”

But something bad did happen, and it was really, really bad. The short version is that Curtis was electrocuted on the job. He survived but lost an arm, a leg and spent five years undergoing reconstructive plastic surgery. The long version tells an amazing story; you can download it by pasting this link into your browser: www.lrws.gov.sk.ca/curtis-weber-story-2005.

Curtis doesn’t preach to classrooms. “I try to paint a picture for them,” he says. “I show them my Grade 12 grad photo, I tell them about my friends, how I was offered a chance to play Junior A hockey. I try to show the impact of that one time when I wasn’t quite sure about something, and I didn’t ask. If I had, my life would be very different.”

On average, about 8,000 young workers are injured on the job in Saskatchewan every year – three die. If that statistic doesn’t make you think, it should. You work to earn money so you can enjoy life: get a car, go skiing, and buy stuff. You don’t go to work expecting to die.

Ask questions.
There’s no such thing as a stupid question. Asking questions can save your life.

Go with your gut.
If it feels wrong, then it probably is wrong. Always ask your supervisor or an experienced worker if you’re not certain of the safest way to do something, or if a situation looks unsafe.

Know Your Rights
As a young worker, you have:
- The right to know the hazards and what to do to prevent injuries from those hazards.
- The right to participate in health and safety activities in your workplace.
- The right to refuse work that you believe to be unusually dangerous to yourself or others.
Every one of the 8,000 injuries is preventable. But if that's true, then why are there so many? Haley Robinson, a 22-year-old Graduate in Health, Safety, and Environment at BHP Billiton, thinks part of it has to do with our prairie work ethic: "Saskatchewan people are hard workers, and there's a misconception that safety is wasting time because safety can slow you down. But you produce more if you're in one piece, so I think we have to shift from a productivity-first culture to a safety-first culture."

She also believes young people are very open to safety messages; the challenge is often the environment. "If it's clear from day one that the employer will support them, young people will develop awesome safety habits. But if the young worker doesn't have role models practicing safety, if they see safety steps being skipped or feel like they can't speak out because they're afraid they'll lose their job or their hours, that's a problem."

The times when you feel uncomfortable, not quite right or at risk are exactly the time young workers need to speak out. How to get over the 'comfort level' wall? Haley and Curtis believe it's a matter of encouraging young workers to speak up and voice their concerns.

Tim Lewis grew up on the Pelican Lake First Nation. After finishing Grade 12, he moved to Saskatoon to go to university. He dropped out after first year, spent a year working and travelling, then went back, first to First Nations University of Canada for Business Administration, then to the University of Saskatchewan for Commerce. Since then, he's been building an entrepreneurial career in online sales and marketing . . . and he's been doing it on his own terms.

**What was the inspiration for Tansi Clothing?**
I set it up when I was in my second year of Commerce. I saw an opportunity to promote the Aboriginal language through fashion. Tansi is Cree for hello. We created different designs of the word using Plains Cree syllabics and language, and put them on shirts. We just re-launched this past December with a whole new line of clothing, and designs in eight different languages: Cree, Métis, French, German, Inuktitut, Italian, Ojibwe and Punjabi.

**Would you describe yourself as a businessman?**
I don't know. To First Nations, the word ‘business’ can have a bad connotation. Business can be about exploitation, about somebody winning and somebody losing. That’s not my philosophy. In Arlene Dickenson’s book, The New Art of Persuasion, she says both parties should be able to benefit from a business transaction. That’s definitely my attitude. First Nations are more democratic in our approach to business. Rather than have winners and losers, our philosophy is to ensure everyone contributes to decisions and everyone benefits from agreements.

**So why choose business as a career?**
I think there are opportunities, and I think there's a better way to do business for First Nations. Also, I never really liked being tied to a desk day in and day out. I like to create my own environment. I like working on a variety of different projects, not just one job. I've operated Tansi Clothing since 2005, and I recently started my own marketing consulting business. Having to balance different things is fun - it's what makes my brain tick.

**Did your philosophy make it tough to fit in to Commerce?**
I often felt I didn’t belong, because some of the principles didn’t fit my ideology. Why can’t we all succeed? That’s what I like about Dickenson’s approach. I like the attitude that we can all be winners.

**What was the biggest challenge going to post-secondary?**
Being away from my usual surroundings was an adjustment but I was lucky to have my friends also attend university at the same time.

**But you left after a year?**
I stuck out the first year, but then I quit and got a job. I worked in a hotel, at the airport. I also travelled for six months, I moved to Arizona for a while.

**What was different when you went back?**
Being out of school was really good for me, because it forced me to talk to people. I needed to get out in the world and find myself. I think the best thing I ever did for myself was participate in Toastmasters; it helped me speak in public. I think they should offer it to all First Nations students before they come to the city.

**Where do you see yourself in 10 years?**
I see myself moving home to Pelican Lake First Nation, giving back to my community. I’d like to have a house that’s off the grid, completely self-sufficient. I’d like to grow my own food, have an electric car. I’d like to help other First Nations people start their own business, maybe start a circle of First Nations entrepreneurs to incubate First Nation youth in starting their own businesses.

**Any advice for Grade 12 students?**
Go on a trip by yourself, take an exchange program, go backpacking across Europe. Get outside your element and away from everything you know. Get lost and find yourself. Take Toastmasters and learn how to speak in front of people.

**My advice?**
Kāya pakiciŋ – don’t give up.

Dickenson’s book, The New Art of Persuasion, she says both parties should be able to benefit from a business transaction. That’s definitely my attitude. First Nations are more democratic in our approach to business. Rather than have winners and losers, our philosophy is to ensure everyone contributes to decisions and everyone benefits from agreements.

**Education.** If you’re interested in starting your own business or developing a career as an entrepreneur, getting a business degree or diploma is a good first step. The province’s universities, SIAST, SIIT and regional colleges all offer a variety of programs.
Earn while You Learn

Realize. Your Future.

With over 100 programs, we can help you achieve it.

**Not sure what you want to do?**
With student supports and services like the Student Employment and Career Centre and our academic advisors, we can help you find the answers.

**Education opens minds and opens doors.**

Find out how we can help at **usask.ca**
Curtis Weber was a typical teenager. He had lots of friends, excelled at hockey and sports, and loved to roar around on snowmobiles. He had just graduated from Grade 12 and was looking forward to taking his hockey career to the next level. Instead, three days into a new job, a horrific accident changed everything.

How were you injured?
I was part of a crew that was building steel grain bins. I was holding the support beams for the hopper when a crane with cables attached to the hopper hit a power line. Over 14,400 volts of electricity went through me. Somebody said it was enough power to light up a town.

Was it a long recovery?
Well, my injury happened in 1999. I was in a coma for six weeks and in the hospital for six months. I spent another six months going to physiotherapy three times a week. Over the next five years, I had over 30 surgeries in Saskatoon and another 12 or 13 reconstructive plastic surgeries in Toronto. Basically, I spent almost a quarter of my life to that point recovering from an accident that happened in a split second.

How did you get the job with WCB?
To be honest, safety was never something I looked at as a career. After all the rehab and operations, I took a program at SIAST Woodland Campus in Prince Albert so I could work in fish & wildlife. Then the WCB approached me about being a spokesperson for youth. Since there weren’t a lot of jobs in wildlife at the time, I thought it would be a chance to make a difference.

What does the job involve?
At first, I travelled around the province sharing my experience with young people. Then my role evolved to include training, so now I do both. The training aspect has really grown in the last few years. I do workshops on everything from half-day sessions on injury prevention to two-day workshops on Return-to-Work plans.

Did you get any training or education?
I’ve had courses on ergonomics and prevention of workplace injuries, and I have a diploma in Adult Education. It’s important to understand people’s different learning styles, because you have to connect with people in ways they can relate to.

What was your first week like?
I was extremely nervous. My first week was in May of 2007, during National Occupational Health & Safety Week. I had two presentations a day for the whole week. I’d never done any public speaking before, and was always scared of making oral presentations at school. But getting thrown into it like that turned out to be good, because at least I got through my nerves more quickly.

What’s the best part of the job?
The most rewarding part is the feedback. Teachers have told me that they’ve never seen anyone keep the attention of their class for so long. One parent phoned the school after a presentation and said their child brought up the issue of safety around the farm at the dinner table. I’ve had parents say they need to have this talk with their kids. It’s just good to know you’re making a difference.

What’s your main message for kids?
I know my message isn’t going to change the way most kids behave. I know because I was a big risk-taker as a kid. I was always doing crazy things and nothing bad ever happened. I thought nothing bad would ever happen; no kid ever does . . . until it actually happens. So I tell kids that no one expects them to live in a plastic bubble; they’re kids, they’re going to take risks. I just encourage them to think things through a bit more, assess the risks. And if you’re unsure about something, especially on the job, speak up. That one time you stay silent could change your life.

If you had told me when I was 15 that I’d be travelling the province speaking about workplace safety, I would have laughed.
Teens Create Own Job Search Site

In 2011, Evelyn Morett and a group of friends turned their job search frustrations into an online business. They established teenwork.ca, a website dedicated to helping young people find work.

At last count, the site had over 3,900 youth-friendly job listings in Saskatoon, Regina, Edmonton and Calgary. And its reach is growing.

There’s a lesson here for the young & entrepreneurially-minded. If at first you don’t succeed at finding the job you want … consider creating your own job.
Aaron B. STARR
Lawyer

Aaron Starr obtained his law degree in 2011 from the University of Saskatchewan and was admitted to the Saskatchewan Bar in 2012. He’s now practicing with McKercher LLP in Saskatoon. A member of the Starblanket Cree Nation, he’s focused on building a practice in corporate and commercial law, real estate, estate planning, family law and First Nations legal issues.

You had a promising hockey career, what made you choose university?
I come from a well-educated family. My mom is a retired social worker, my dad has two degrees and works at Cress Housing, my sister is a social worker and my brother is in medical school. Education was always a priority in our house. In high school, my goal was definitely to make the NHL – I tried out with the Philadelphia Flyers – but I knew university was for me. If hockey didn’t work out, I always wanted something to fall back on.

Why law?
There are issues in First Nations communities that I want to be able to help with, and I believe there are opportunities for First Nations in corporate and commercial business. You don’t see a lot of First Nations lawyers practicing in the corporate and commercial area.

How did you find university?
In high school, everything came easily. At university, it was harder. I played for the University of Manitoba Bisons during my undergraduate years, and it was a struggle at first to balance hockey and school. I believe when you play sports at a competitive level, you develop skills that will help you be successful in other areas. My work ethic, punctuality and competitiveness I feel transitioned to my studies and allowed me to do well. One of the major things I found I needed to work on was my time management and not to procrastinate.

Did those lessons translate to law school?
The study habits, yes, but the transition to law school was still a challenge. As an undergrad, you memorize information and give back what you were taught. Law school was different. It consisted of critical thinking, synthesizing information and applying what you’ve learned to different fact patterns. It’s difficult, because there isn’t necessarily a right or wrong answer; in a typical legal fashion the answer is “it depends.” It took me a long time to realize this and to develop legal analysis skills.

What drives you?
When I was growing up, I always told myself that I never wanted to reflect back on my life and regret not having had done something or think, ‘oh, I wish I’d done that when I had the chance.’ That feeling has always driven me. I’ve had family support along the way – they’ve always given me opportunities to do whatever I wanted to do, be it hockey or school. In a sense a lot of my accomplishments are their accomplishments as well.

Did you ever experience racism at school?
Yes, even with all the good opportunities I’ve had, I still experienced an extensive amount of racism. Over the years, you develop a thick skin, but it still affects you – sometimes you don’t realize how much. I was fortunate enough to have my parents backing me up; they taught me to be proud of who I was and proud of my culture. It doesn’t bother me as much now. I’m more confident and I don’t let people have that power over me. That’s what I’ll tell kids who face prejudice and racism – don’t let other people have that power over you.

I’ve always had goals – goals are what keep me going.

Job Prospects – Fair. In 2011, the average annual wage for lawyers was $140,000.

Education. Before you can apply to law school, you’ll need a bachelor’s degree or several years of undergraduate studies. You’ll also have to write the LSAT (Law School Admission Test). It’s a half-day, standardized test administered four times a year at designated testing centres across Canada. You can find out more at www.lsac.org/default.asp

Get the NOC Code. The NOC (National Occupational Classification) code for Lawyers is on page 26 of the Job Chart. For more info, enter the code at the NOC website, www5.hrsdc.gc.ca/NOC/English/NOC/2011/Welcome.aspx
Northlands College offers programs throughout northern Saskatchewan, with student residences in the main centres of Buffalo Narrows, Creighton and La Ronge.

Programs range from apprenticeship and trades-related training to university studies, technical training for employment in the mining and oil sands industry, to health and community service courses as well as academic upgrading.

Northlands College counsellors can assist you in planning a career that suits your interests and aspirations. **We have the right course for you, right here in the north. Contact us now!**

Northlands College... Your Path to Success!
1-888-311-1185 or visit www.northlandscollege.sk.ca
When Haley Robinson left La Ronge to go to school, she travelled farther than most. She enrolled in the health studies program at Queen’s University in Ontario, and spent a year in England at a satellite campus located in an old castle. She loved the experience, but when she saw an opportunity with BHP Billiton, she jumped at the chance to come home.

What do you do?
In May 2012, I graduated with a Bachelor of Arts in Health Studies from Queen’s, and got hired as a Graduate in Health, Safety and Environment with BHP Billiton in Saskatoon. The company’s Foundations for Graduates Program lets graduates just out of university spend two years learning from experts. My focus right now is occupational health.

Did the job bring you home?
I’d always planned to live here after school. I loved the opportunities I had at Queen’s, but I think Saskatchewan is the greatest place to live. People are more connected and easy-going. I feel lucky to have this opportunity right out of university to work in my chosen field with a company here at home.

Were there benefits to moving away?
Being away opened up a lot of new opportunities and gave me a broader perspective on Canada and the world. It also made me appreciate Saskatchewan more. I love the sense of freedom and outdoor spaces — I guess Ontario is too crowded for me.

What was your first week on the job like?
When I was hired as a graduate, I was put straight into the action. But I’d worked at BHP as a summer student for two summers, so I wasn’t new to the company. It’s been great. I’ve had good projects, a lot of support and lots of learning through experience, which I really appreciate. I also like spending time at the Jansen mine site, although I’m based out of Saskatoon.

What do you like most about your job?
I think it’s the different projects, the fact that there’s always something new and interesting to learn about occupational health and building a potash mine. I have been lucky to see projects I have helped with be implemented successfully. My work is never boring, and I get a lot of satisfaction from the job.

What do you think is the most important skill in the workplace?
I’d definitely say communication, both ways. It’s important to give information out and listen to information coming in.

Where do you see yourself in 10 years?
Definitely still in the public/occupational health field. There is a lot of job satisfaction in being able to improve health and workplace environments here in Saskatchewan. A big part of being able to improve public health is being able to identify and understand the root causes of health issues by talking to people. I like working directly with people.

Any advice for someone thinking of a similar career?
I think getting industry experience is important. Try to get a summer job in the field as early on as you can in your education. Experience teaches a lot, because you see how things function in the real world. Also, check out the companies you think you might be interested in working for, and see if they hire summer students.

One thing I learned, the best time to look for a summer job with a lot of companies is October or November. Start early.

Job Prospects – Good. Occupational health and safety specialists analyze work environments and work procedures, inspect workplaces for adherence to regulations, and design programs to prevent disease or injury to workers and damage to the environment. Average annual income is $77,300.

Education – Diploma or degree. Education options include bachelor degrees specializing in public health at the University of Saskatchewan, University of Regina and First Nations University, and certificate and applied certificate programs through SIAST and regional colleges.

Get the NOC Code. Occupational health and safety officers are part of the larger National Occupational Classification (NOC) 2263: Inspectors in Public and Environmental Health and Occupational Health and Safety. See page 23 of the Job Chart. For more info, enter the code at the NOC website, www5.hrsdc.gc.ca/NOC/English/NOC/2011/Welcome.aspx.
So you’re thinking about a nursing career … **good for you.** Did you know you have several options?

### Spotlight on Nursing

**Continuing Care Assistant/ Special Care Aide**
A one-year certificate program offered by SIIT, SIAST, DTI and through regional colleges, let you work with registered nurses, registered psychiatric nurses or licensed practical nurses in home care settings, special care facilities, hospitals and integrated facilities.

Training combines classroom and hands-on learning through clinical experience. The focus is on home care, long-term care, special care and acute care settings. An aging population, longer life expectancies and outpatient treatment, the demand for ‘people who enjoy caring for people’ is growing.

- Continuing Care Assistants fall under the NOC code 3413, Nurse Aides, Orderlies and Patient Service Associations. Average annual wage is $38,200.

**LADDER UP!** SIAST offers a bridging option program for Continuing Care Assistant graduates wanting to enter the Practical Nursing program.

**Licensed Practical Nurse (LPN)**
A two-year diploma program offered by SIAST and through SIIT, Dumont Technical Institute and regional colleges lets you work in a variety of settings — hospitals, nursing homes, extended care facilities, rehabilitation centres, doctors’ offices, clinics, community health centres, even private companies and homes.

Training combines classroom and hands-on learning through clinical experience. You’ll learn to provide professional nursing care independently and as a member of a multidisciplinary health care team.

- The NOC code for Licensed Practical Nurses is 3233. Average annual wage is $53,900.

**Registered Psychiatric Nurse (RPN)**
A three-year diploma in Psychiatric Nursing offered through SIAST prepares you to become a Registered Psychiatric Nurse (RPN). This is a distinct field of nursing practice in Western Canada (Saskatchewan, Manitoba, Alberta and British Columbia).

RPNs work in a wide variety of mental health settings. Your training combines classroom and hands-on learning through clinical experience.

- RPNS are listed in the same NOC code as Registered Nurses, 3012.

**Registered Nurse (RN)**
A four-year Bachelor of Science in Nursing degree offered at both the University of Saskatchewan and the University of Regina/SIAST lets you provide direct nursing care to patients, deliver health education programs and provide consultative services regarding issues relevant to the practice of nursing. With experience and additional education/training, RNs can rise to management/supervisory positions.

Both the University of Saskatchewan and the University of Regina/SIAST offer the degree program around the province through satellite campuses and colleges.

- The NOC code for Registered Nurses is 3012. Average annual wage is $79,400.

**Nurse Practitioner**
Take your RN to the next level with a post-degree advanced certificate offered through the University of Saskatchewan and SIAST. Nurse Practitioners are RNs with advanced training in providing primary health care and treatment in conjunction with physicians and in collaboration with other health professionals. Nurse practitioners work in community health centres, hospitals, clinics and rehabilitation centres.

- The NOC code for Allied Primary Health Practitioners (including Nurse Practitioners) is 3124.

**Learn More!**
There’s a whole world of choices in nursing and health related fields. Check out these websites:
- Saskatchewan Registered Nurses’ Association ([www.srna.org/](http://www.srna.org/))
- Saskatchewan Association of Licensed Practical Nurses ([www.salpn.com/](http://www.salpn.com/))

Are you looking for great career opportunities, rewarding lifestyles, respect and good pay? Consider an apprenticeship in the skilled trades. When you complete the SYA Program and register as an apprentice, you’ll get great benefits – no registration fees, no tuition for first level technical training, plus 300 hours of trade time credits. Ask your principal, guidance counsellor or PAA teacher for SYA Program details, or visit us on the web.

Graduating soon? ...think health care!

Visit saskatoonhealthregion.ca and click on Join Our Team.
Don’t plan your career without knowing your options.

This section of Relevance magazine will give you a better understanding of your options.

Job Chart 2013 provides information about hundreds of Saskatchewan jobs. Some will be more familiar than others. Who knows? Job Chart might introduce you to a job that you have never heard of but would be perfect for. Take some time to learn more about what’s out there.

What Does This Information Mean?
Job Chart contains the following relevant information for each job title listed:

Job Description
This is merely an introduction. For more detail about job duties, talk to someone who does this for a living, or visit www.workingincanada.gc.ca for career information on an array of occupations for regions in Saskatchewan (and across Canada).

Number Emp. (2011 Estimate)
Remember, there is more turnover (and as a result, more openings) in jobs with high employment.

Wage Estimate (2011)
This gives you a general sense of what you can expect to earn in each job. Within designated trades, journeypersons typically earn more than apprentices. More current and detailed wage data for over 320 common occupations in Saskatchewan is available at http://www.er.gov.sk.ca/sk-wage-survey (2011 Saskatchewan Wage Survey).

Training and Education Routes
This gives you a general list of Saskatchewan institutions that offer programs relevant to each job. For specific details, CONTACT THE INSTITUTION DIRECTLY! See page 32.

Prospects to 2017
If you are planning a career, it’s important to know what your long-term employment prospects might be. With this in mind, we offer you the following three employment indicators.

🌟🌟🌟... Good
🌟🌟... Fair
🌟... Limited

Note: These indicators reflect employment opportunities over a five-year period, 2012 to 2017, based on current and future labour market trends.

Education Icons
These icons indicate the level of education you likely will need to complete before working in a given job. To work as a lawyer, for example, you will need to attend university. To work as a plumber, you will need to complete apprenticeship training.

Dear training typically provided on the job
⭐⭐⭐ job requires apprenticeship training
⭐⭐ job requires college education
⭐⭐⭐ job requires university education
⭐⭐⭐⭐ transition

The difference between universities and colleges is not as clear as it used to be. In fact, many of the programs that were once exclusively offered at university are now available in part at SIAST or the Regional Colleges. And this benefits students, particularly in rural and remote areas.

This symbol (⭐⭐⭐⭐) means that some portion of the university requirements for a job can be completed at the college level. Whatever post-secondary course you are interested in, find out what options exist by contacting the institution.

We have made every effort to ensure the information provided in Relevance is accurate. As an applicant or counsellor you should check with the appropriate institution to verify information and check for changes. In some instances, the training information provided represents a starting point and additional training and/or transfer may be required to meet professional, occupation or trade requirements. University classes are available at all Saskatchewan Regional Colleges. Courses from both the University of Regina and the University of Saskatchewan, through transfer agreements, enable students to complete one or more years of full-time university study at an institution near them.

**DATA SOURCES:**

*Job Title and Job Description:* This information—and in fact, the whole structure of the Relevance Job Chart—is derived from the National Occupational Classification system (NOC). For more information on the NOC, visit www5.hrsdc.gc.ca/NOC/

*Average Annual Income 2011:* Wages are based on full-year, full-time employment for each occupation. Workers may earn more or less depending on their employer, location, size of company, training, experience and hours worked. Highly skilled workers may earn significantly more than the average. Wage information provided by Saskatchewan Ministry of the Economy.

*Training and Educational Routes:* This information is provided by Saskatchewan education and training institutions. This is not a comprehensive list of programs and courses. It is intended as a general guide to help you find education related to Saskatchewan occupations.

*Number Employed — 2011 Provincial Estimates Employment Prospects — 2017:* Data for these two columns is provided by Saskatchewan Ministry of the Economy.

Take Your **JOB SEARCH ONLINE**

The internet has changed the way we look for jobs. You don’t see too many young people reading the ‘help wanted’ pages in the local newspaper (FYI – newspapers still publish help wanted ads) – especially not when you have thousands of job postings at your fingertips through online job search websites.

Explore Your Options:
There are thousands of occupations in Canada, in hundreds of fields of work. Let your interests guide you as you explore your career options and discover unique job opportunities, inspiring education programs and helpful resources. Canada’s sector councils can help by providing you with information on:

- career opportunities, other materials.
- apprenticeship and trades training, and
- the labour market,
- skills development.

Visit [www.councils.org](http://www.councils.org) for more information about Canada’s Sector Councils. Whether you’re planning, building or changing careers, you can identify job possibilities and training opportunities, locate useful Websites, and even order videos, brochures and other materials. Provincial labour market information and careers can be found at: [www.Futurepaths.ca/labourmarkets/](http://www.Futurepaths.ca/labourmarkets/)
So
You're NEW
to
Saskatchewan

First of all, welcome! We hope you find our province a friendly, safe and beautiful place to live. We also hope you learn to enjoy, or at least endure, our winters.

Now that you’re here, it’s time to see what kind of life you want to live. Whether you’re at school, at home, at work or looking for something to do in your spare time, you probably have questions about what to do. There are lots of places to find answers.

Online
The Government of Saskatchewan’s Immigration website is probably the best place to start. The site has information on immigrating, working, living and studying in Saskatchewan: www.saskimmigrationcanada.ca/saskatchewan

In-Person (or by phone or email)
Visit a Regional Newcomer Gateway (a.k.a. Newcomer Information Centre). Think of these as the ‘live’ version of the Government of Saskatchewan’s website. They are your best place to find out anything & everything you need to know about living in Saskatchewan. Services include:
• English language testing
• Referral to programs
• Information on what’s available in your community
• Free internet, printing, calling or faxing!

We recommend visiting in-person, but you can get an idea of the type of services offered by checking out Saskatoon’s Newcomer Information Centre’s website at www.nicstoon.org

Look for Regional Newcomer Gateways in the following Saskatchewan communities:
• Estevan
• Humboldt
• Lloydminster
• Moose Jaw
• North Battleford
• Prince Albert
• Regina
• Saskatoon
• Swift Current
• Tisdale
• Yorkton

Getting Settled
Many communities have ‘immigrant settlement agencies’. The main purpose of these organizations is to help you settle in. Programming includes services to help you:
• Find a job or volunteer placement
• Learn about Canada
• Meet new people
• Learn how to shop or cook
• Get your health card or drivers’ license
• Study for school
• With many other things!

Check out the following immigrant settlement agencies in your community:
• Moose Jaw Multicultural Council - www.mjmncinc.ca/
• The Battlefords Immigration Resource Centre (North Battleford) - www.battlefordschamber.com/about_us/immigration_resource_centre.html
• Prince Albert Multicultural Council - http://princealbertmulticulturalcouncil.weebly.com/
• Regina Open Door Society - http://rods.sk.ca/
• Saskatoon Open Door Society - http://sods.sk.ca/

Also in Saskatoon:
• Global Gathering Place - www.globalgatheringplace.com/
• International Women of Saskatoon - www.internationalwomenofsaskatoon.org/
• Saskatchewan Intercultural Association - http://saskintercultural.org/

That’s not all! Many other groups can help you get settled, meet new people or try new things. Speak to someone at any of these organizations to get up-to-date information about programs or services.
• Filipino-Canadian Association of Saskatoon - http://filcas.ca/
• Fransaskois - www.fransaskois.sk.ca/
• Multicultural Council of Saskatchewan - www.mcos.ca/
• Pakistan Canada Cultural Association Regina - www.pccaregina.com/
• Saskatchewan German Council - www.saskgermancouncil.org/
• Ukrainian Canadian Congress, Saskatchewan Provincial Council - www.uc.sk.ca/

Studying
If you’re in school, don’t forget the resources at your fingertips — your teachers and guidance counsellors. You can also check out some of the ‘extra-curricular’ activities in after-school groups: play intramural soccer, travel or go skiing, advocate for human rights, make videos, perform in a play. Whatever your interests, speak to your teacher about ways to get involved.

For more educational opportunities, speak to the guidance counsellor at your school or visit your Regional Newcomer Gateway.

Other good resource sites:
• Newcomer Student Centre in Saskatoon; download a brochure at www.spasd.sk.ca/files/newtocanada/Brochure_Newcomer_Student_Centre.pdf
• University of Regina - www.uregina.ca/
• University of Saskatchewan - www.usask.ca/
• SIAST campuses in:
  » Moose Jaw - www.gosiast.com/about/campuses/palliser.shtml
  » Prince Albert - www.gosiast.com/about/campuses/woodland.shtml
  » Regina - www.gosiast.com/about/campuses/wascana.shtml
  » Saskatoon - www.gosiast.com/about/campuses/kelsey.shtml

Remember – if you have any questions about life in Saskatchewan, check out your nearest Regional Newcomer Gateway. Be sure to get involved — it’s the best way to get to know your new home!
Anne-Marie HOWIE
Journeyperson Electrician, Project Foreman

Anne-Marie jumped into the workforce right out of high school. When she went back to school, she chose a traditional career path: office administration. But after completing the course, she quickly found that working in an office setting didn’t suit her. She faced a tough choice: stick with a career she didn’t like, because she’d already invested in the education, or make a change. Anne-Marie took a courageous step and started to explore a career in the trades.

**How did your family react to your interest in the trades?**
Honestly, I think it surprised them. My dad and uncle both work in the trades, but it really caught them off guard when I said, ‘hey, this is what I want to do.’

**What made you decide to be an electrician?**
I was looking at three trades: carpentry, plumbing and electrical. I can’t cut a straight line to save my life, so not carpentry. You sometimes have to deal with smells as a plumber, and I have a pretty sensitive nose, so not plumbing; that left electrical. Also, I’m strangely good at math and that’s a big part of the trade, so I thought it would be a good fit.

**How did you start?**
You have to get a job in the trade and register as an apprentice. I tried to get a job, but I didn’t have any luck so I took the pre-employment applied certificate program at SIAST to get some experience. I went to Moose Jaw for six months. It was a lot of fun – I used tools for the first time, I got to practice rewiring in a pretend room, I lived the student life.

**What came next?**
After I completed the program, I started sending out resumes. I sent 40 or 50 and got one interview. But I never gave up. Then one day I’m having dinner with a friend, and he said he knew an electrician who was looking for help. I met Colin from Storm Electric and got hired. That allowed me to register as an apprentice.

**How long did it take to become a journeyperson?**
It took me five years in total, including the pre-employment. I got my journeyperson certificate in June 2012. Now, I’m a Red Seal endorsed electrician, which means I can work anywhere in Canada. It also meant a hike in pay and more responsibilities. I’m a project foreman now, and I’m also supervising an apprentice.

**What do you think is your most indispensable workplace skill?**
Persistence. There are always challenges in this trade, especially in renovation work. You have to problem-solve, think outside the box to get things done.

**What do you like the most about your career?**
I like that I’m my own boss and I love helping people get the home they want. I love having happy customers – it’s just a good feeling.

**Where do you see yourself in 10 years?**
I’ve already been asked if I want to buy shares in the company, so I’m working to be part owner of Storm Electric. Down the road, I see growing the company.

**What advice would you give a student wanting a trade?**
Again, be persistent. It’s about what you want to do, not what other people think you should be doing. Go with what you believe.

Job Prospects – Good. Average annual income for electricians is $54,900. You must be registered as an apprentice to work in the trade. To register, you must be working in the trade under the supervision of a certified journeyperson. Employers prefer workers who have completed Grade 12.

Get a Head Start. The Saskatchewan Youth Apprenticeship (SYA) program provides a career pathway to trades and technology careers. It combines hands-on, practical learning with periods of technical training. Learn more at www.saskapprenticeship.ca/youth_apprentices/

Get the NOC Code. The NOC (National Occupational Classification) codes for trades, including Electricians, are on pages 29–31 of the Job Chart. For more info, enter the code at the NOC website, www5.hrsdc.gc.ca/NOC/English/NOC/2011/Welcome.aspx

FGC JOHN DEERE
BUILD YOUR FUTURE
FIND YOUR FIT ONLINE: FGCENTRE.COM/CAREERS

SOME THINGS CAN ONLY BE EXPERIENCED BY GETTING BEHIND THE WHEEL.... OR IN THE SHOP.... OR IN THE FIELD.

Agriculture is a thriving industry, with great potential for growth as a NOC 7312 Heavy Duty Equipment Mechanic/Agricultural Machinery Technician or NOC 1472 Parts Clerk. Get in on the ground floor through part time Winter/Spring and full time Summer openings at FGC.

We’re looking for individuals that:
- Enjoy solving problems and are eager to learn new things
- Have the ability to take initiative and work within time constraints
- Consistently demonstrate exceptional customer service
- Have a valid driver’s license and good driving record

Why build a career with FGC?
- We provide on the job training, apprenticeship and college opportunities. All staff receive up to 100% reimbursement for post secondary education; we spend more as a dealership per employee on training than any other John Deere dealership in Canada.
- Urban and rural locations in Saskatchewan
- Pay ranges are above the average income for experienced NOC 7312 & 1472 careers

Build your future with FGC! Email a resume to mknezacek@fgcentre.com

for more information go to www.relevancemag.ca
Denise TRELEAVEN
Flight Nurse, STARS Regina

Denise Treleaven was working as a registered nurse in Regina General’s ICU when she first heard that STARS was coming to Saskatchewan. STARS – Shock Trauma Air Rescue Society – provides safe, rapid, highly specialized emergency medical transport for the critically ill and injured. Denise checked out the website, saw that she had the necessary experience and qualifications, and decided to send in her application. Now, she’s added a new dimension to her career – as a STARS flight nurse.

**Why did you want to be a flight nurse?**
I work in the medical and pediatric Intensive Care Unit (ICU) at Regina General Hospital. I’ve been on road and air transport teams when we pick up critically ill children and either bring them to our facility or transport them to Alberta for more advanced treatment. I saw STARS as expanding on a medical service I was already doing. I enjoyed the air ambulance transports, so I thought, ‘why not a helicopter?’

**What kind of training did you need?**
You have to be a registered nurse (RN) with at least three to five years experience in emergency room (ER) or ICU in order to apply, which I had. For STARS, air medical crew take 10 weeks of very intense training. From March to June last year, I spent almost six weeks in Calgary and Edmonton taking classes, doing simulations on high-tech mannequins and running scenarios. We spent time in ER and ICU departments practicing different skills. I flew in a STARS helicopter; they have a buddy system where you go out with an experienced crew. At the end of the 10 weeks, there was an exam and test scenario. By then, you really have to know the protocols inside and out.

**What was your first mission like?**
It was pretty exciting to be able to help someone. It was July and we got called to pick up someone who’d been critically injured. There were four of us: two pilots, a paramedic and flight nurse. The paramedic and I spent the flight out talking over possible scenarios. After it was over, I just had this great feeling knowing my training had totally prepared me to be part of the chain of survival.

**Is flying in a helicopter different than an airplane?**
Very different! The first mission was on a hot day with turbulent winds and bad wind shears. It was a rough ride and we got tossed around a bit, which didn’t agree with my stomach, but you carry on.

**How is being a STARS Flight Nurse different than an ER nurse?**
The main difference, I think, is the autonomy. In a hospital ER, you always have access to the physician. In the helicopter, you can reach the transport physician by phone, but it might take time or the reception might not be great, so there are times when you’re on your own and you have to make decisions. There are protocols in place, but it still adds to the pressure.

**How often do you work?**
I work 60% time, which is a little more than half time, at STARS, and I also work half-time at Regina General. STARS encourages us to keep our nursing and paramedic jobs, because it keeps us connected to physicians and the health care system.

**What do you like most about the job?**
It’s hard to put into words why I’m so passionate about the job. It’s exciting, but it’s also more than hopping into a shiny red helicopter. If I had to narrow it down to just one thing, I’d say it’s the team atmosphere, the camaraderie. It’s so amazing.

---

**Education.** To be a STARS flight nurse, you need to be an RN with three to five years experience in ER or ICU. This is just one of many opportunities in nursing. Check out our Spotlight on Nursing on page 15.

**Get the NOC Code.** NOC (National Occupational Classification) codes for health occupations are on pages 23-25 of the Job Chart. For more info, enter the code at the NOC website, www5.hrsdc.gc.ca/NOC/English/NOC/2011/Welcome.aspx
Skilled trades provide so many opportunities – including, most importantly, the opportunity to come to work looking forward to creating, building and accomplishing the goals of the day. Whether you have an analytical mind with superior math skills or a creative brain with new ideas, one of the 47 designated trades or 23 sub-trades in Saskatchewan can provide the perfect match.

How do you get started in the skilled trades?
Through apprenticeship. An apprenticeship is one in which you ‘earn as you learn.’ This type of learning has been around forever – the best way to learn is by doing. The majority of your time will be spent learning on the job from a skilled journeyperson. You also spend some time each year in technical training.

The first step is to decide what skilled trade is best for you. Many young people have experienced the skilled trades through high school classes or the Saskatchewan Youth Apprenticeship (SYA) program. Check out our website – www.saskapprenticeship.ca – and look at the list of Designated Trades for descriptions. We can arrange for you to talk to someone to help you decide what best suits you.

Once you’ve decided on a trade, the next step is to find an employer. There are so many opportunities in Saskatchewan right now in the skilled trades, so employers are looking for workers. Try www.saskjobs.ca as a starting point. Or, if you know where you might like to work, contact the employer and describe the skill sets you bring. Ask them if they would consider hiring and training you as an apprentice, and sign a contract of apprenticeship. This contract sets you up with the Saskatchewan Apprenticeship and Trade Certification Commission (SATCC) as an apprentice. You and your employer begin tracking the number of hours you work on the job and advise the SATCC.

Once you have worked enough hours, you will be scheduled to attend technical training, usually for about eight weeks. Here you learn theory, usually in a technical institute, to reinforce the knowledge and skills taught in the workplace. After you have completed the required levels of workplace and technical training for your trade, you have the opportunity to write your journeyperson exam.

When you pass your journeyperson exam in a Red Seal trade, you receive your Red Seal Interprovincial certification. This allows you to work in your trade anywhere across Canada. The key to remember is that your certification is a starting point to a career full of opportunities – from manager to instructor to entrepreneur.

The benefits to apprenticeship training are that you learn from a journeyperson while earning a wage. You have little education-related debt. There are also financial supports, including grants and tax credits to help you out.

Want to find out more? Check us out at www.saskapprenticeship.ca, like us on Facebook (Sask Apprentice) or follow us on Twitter @SKApprentice.

Why Choose Apprenticeship?

How can I help those in need?

1.866.783.6766 | parklandcollege.sk.ca

for more information go to www.relevancemag.ca
Ryan Christmann happily admits that, as a Grade 12 student, his mind wasn’t on career planning as much as it was on the football field. He was talented enough to get noticed. Given a choice between playing university football and junior football in Kelowna, B.C., he opted for the junior league. His football career with the Okanagan Suns helped hone a strong work ethic that’s seen him rise quickly through the ranks in his chosen career.

What made you decide on a career in the trades?
I grew up on a ranch/farm near Central Butte, and I’ve spent my whole life working on machinery and doing carpentry. In high school, I did a work-ed program that involved afterschool work at the local John Deere dealership. I enjoyed it, so I decided to enrol in an agricultural technician apprenticeship program. I was accepted, but ended up going to British Columbia instead.

What is the most indispensable skill in the workplace?
For me, the most important thing isn’t so much a skill as a work ethic. If a combine breaks down in the middle of harvest, for example, the farmer can’t finish the job, which directly impacts the operation’s profitability. You have to be willing to put in the extra time and effort at those times, go the extra mile. When you do, good things happen.

What advice would you give to someone interested in the trade?
It’s a great time to get into the trade. Agriculture is strong across the province. The world needs farmers, farmers need equipment and equipment always needs mechanics. If you’re a skilled tradesperson, you can write your own ticket.

What surprised you the most about post-secondary training?
How much I enjoyed it. I’ve never been a ‘book person.’ I was never a failing student, it’s just that I like doing things with my hands. I chose the trades because the training is split – you learn theory but you also get hands-on training. I excelled at that.

Job Prospects – Good. Agricultural machinery technicians have the same NOC code as heavy-duty equipment mechanics. Average annual income is $60,100. You must be registered as an apprentice to work in the trade. To register, you must be working in the trade under the supervision of a certified journeyperson. Employers prefer workers who have completed Grade 12.

Get a Head Start. The Saskatchewan Youth Apprenticeship (SYA) program provides a career pathway to trades and technology careers. It combines hands-on, practical learning with periods of technical training. Learn more at www.saskapprenticeship.ca/youth_apprentices/

Get the NOC Code. The NOC (National Occupational Classification) codes for Heavy-Duty Equipment Mechanic/Agricultural Machinery Technician is on page 30 of the Job Chart. For more info, enter the code at the NOC website, www5.hrsdc.gc.ca/NOC/English/NOC/2011/Welcome.aspx
If it feels wrong... it probably is wrong.

Be safe at work. Don't do anything you think is wrong or unsafe. When in doubt, ask someone. Your life could depend on it.

work2live.ca
I wasn’t able to pick the right career path out of high school, but jumping into post-secondary allowed me to quickly evaluate what worked and didn’t work for me.

Born and raised in Regina, Graham Hodges has called Prince Albert home for the past five years. The small city vibe has proven to be a good fit for his life — and his career. Today, he’s part-owner and operator of Mark-It, a Prince Albert-based shop that does vehicle decaling, business signage, web design and graphic design.

What made you choose graphic design?
I’ve always had a passion for layout and design, and this job lets me work with clients to come up with creative methods to help market their business and products. I love taking an initial concept through design and production, and then seeing the final product around town.

What training do you have?
I took New Media Communications at SIAST. It’s tough to find a post-secondary course directly related to this field, but the New Media Communications course was definitely an asset. The course really helped to refine my skills, build my portfolio and ultimately give me a much more professional edge, which I believe helped me obtain my first design job in a sign shop. Since then, a lot of what I do has been self-taught or learned through experience on the job.

What was your first week on the job like?
To be honest, a little overwhelming. It was a completely different pace from what I was used to in past jobs. Deadlines were tight and there wasn’t a lot of time for training. I quickly learned the best way to survive was to always ask questions and take the initiative to learn new skills.

What do you like the most about your career?
The custom nature of each job. It makes work interesting and allows us to constantly experiment with design to keep pushing the limits of what we’re able to produce.

What do you think is the most indispensable skill in the workplace?
Dedication. When an employee loves what they do and it shows through their work ethic, they quickly become indispensable.

Where do you see yourself in 10 years?
Still with Mark-It, but a much larger version of Mark-It. Our footprint around the province has grown quickly, and I intend to keep the forward momentum. I foresee more staff and more locations.

What advice would you give a student wanting to have a similar career?
It’s typical to start in an entry-level position in most sign shops. This gives you an opportunity to learn different roles and figure out where your interests lie. Once you have an idea of whether you would rather be meeting with clients, designing, printing or installing, you can focus your training and experience in the direction you want to grow.

Job Prospects – Fair. Graphic designers and illustrators conceptualize and produce designs, illustrations, layouts and visual images to effectively communicate information. Average annual income is $50,200.

Environment. The work environment for graphic designers is usually fun, creative … and deadline focused. There are opportunities in advertising, animation, multimedia, signage and more. Many graphic designers start their own freelance businesses.

Education. SIAST offers a variety of Visual Media programs, including diplomas in New Media Communications, Media Arts Production and Graphic Communications. First Nations University offers innovative programs in Indian Communication Arts and Indian Fine Arts, and the University of Regina and University of Saskatchewan offer a variety of programs.

Get the NOC Code. The NOC (National Occupational Classification) code for Graphic Designers & Illustrators is on page 27 of the Job Chart. For more info, enter the code at the NOC website, www5.hrsdc.gc.ca/NOC/English/NOC/2011/Welcome.aspx
Okay, we’ve limited our list to the top Saskatchewan sites and then popular Canadian sites, but you can expand your search even further to include far-off destinations. Set aside a few hours and see what kind of opportunities are really out there.
Jayleen Francis had no idea what she was getting into when she started university. Like many students coming from rural communities, she found it was trial by fire. But she persevered and went on to get a diploma in Management Studies from SIIT and then a Bachelor of Administration from the University of Regina/First Nations University of Canada. Her co-op education gave her a head start in the workplace, but Jayleen was looking for a way to make a bigger impact...

**What do you do?**
I work at the University of Regina’s Aboriginal Student Centre as the Success Facilitator for the nitoncépimâ omâ (“We are Here”) Student Success Program, also known as the oma program. I help first year Aboriginal university students prepare for their academic journey — and for their futures.

**What attracted you to the job?**
I always wanted to be in a role that was self-fulfilling and rewarding. I remember how tough and overwhelming it was to transition from high school into the enormous setting of the university. I remind myself of the personal struggles I faced, and that allows me to connect with the students.

**Was this your career goal when you started university?**
I didn’t really know what I wanted to pursue when I started university, I just knew I had to go to university. I never really had any guidance of what university was about or what to expect, so I really wasn’t prepared. I didn’t have a focus, I wasn’t aware of the different programs available and I didn’t know about the student services the university had to offer. My main goal was to finish with a degree, because that was what was going to allow me to provide for my children and their futures.

**What was the toughest part of the transition into post-secondary?**
I was 18 and I had responsibilities I’d never had before. I was helping take care of my younger siblings and I was pregnant with my first child. There was the transition of education as well as the transition of life, so the challenge was in keeping a balance.

**What was your first week in the workforce like?**
The transition to set scheduling was the hardest to adapt to. I felt like it took away my freedom in comparison to being a student, when I could sleep, eat and study at my convenience. Another challenge was feeling comfortable with myself. For a long time, my insecurities hindered me, making me think I wouldn’t do a good enough job. I had to change my attitude and accept the idea that if I didn’t have the required skills, it was okay, I would learn them. As I learned, my confidence increased.

**What do you like most about your job?**
It’s rewarding. I get to help others realize their potential as successful university students. Providing students with assistance in areas of concern has positive impacts on their feelings toward post-secondary and helps in their personal lives, and that allows me to feel accomplished.

**What advice would you give a student wanting a similar career?**
Believe in the job and feel a sense of purpose within yourself for the role. If you can find those reasons within yourself, it will come through in your work. You have to have passion, and your heart has to be in the right place.

**Job Prospects – Limited-to-Fair.** In 2011, average annual wage was $56,500 for employment counsellors and $59,900 for educational counsellors.

**Education.** The education necessary for a job in student or employment counselling varies. Guidance counsellors in schools take a different training path than employment counsellors, and student counsellors in post-secondary institutions may have different educational backgrounds. Ask your student counsellor!

**Get the NOC Code.** The NOC (National Occupational Classification) codes for Educational Counsellors and Employment Counsellors is on page 25-26 of the Job Chart. For more info, enter the codes at the NOC website, www5.hrsdc.gc.ca/NOC/English/NOC/2011/Welcome.aspx

How can I make a difference?
John DESJARLAIS Jr.
Mechanical Engineer, MBA Student

I’d definitely tell people not to shy away from opportunities because of who you are or where you’re from – you can do anything.

What made you decide to go back to school?
I went back to university in 2006. I’ve always been a tinkerer. I love taking things apart and figuring out how they work. I always planned to go back, but when I saw the opportunity to be part of Cameco’s career transition program, I decided it was time to finish engineering. The program allowed me to remain an employee and receive financial assistance while getting my mechanical engineering degree.

Northern students often have to move away from home to go to school, how hard was that?
The biggest thing was culture shock. I actually experienced that in high school, because I moved to Saskatoon in Grade 11. It was a huge transition – I really missed home and family – but it was also a blessing in disguise. It showed me that I wasn’t prepared to live in the city, so I opted to go into the NORPAC program in La Ronge after high school. That was tough too, but I had friends there so it wasn’t as overwhelming.

What surprised you the most about going back to school?
I thought that at 26 I was well prepared, but there were still issues I had to face. Being out of school for so long, I struggled to transition back into studying. Things I used to know, I had to relearn, like high school math. There was also the irony of feeling alone on campus, even when you aren’t alone. I had financial support from Cameco, but I still felt lost.

How did you deal the loneliness?
I got involved in student politics. In a way, that feeling of being alone was probably the most influencing experience in my helping to develop the Northern Administration Students Association (NASA).

What is the most indispensable skill in the workplace?
Communication. I knew from my work experience how absolutely paramount it is to be able to communicate effectively. That’s why I spent the extra semester and took the Professional Communication Option in Engineering.

What advice would you give a student wanting to have a similar career?
I’d tell students not to shy away from choosing engineering. There are people out there who have done it and want to help, but sometimes you have to look for them. I had difficulty finding that someone in my own school career, but I didn’t let it stop me. Engineering isn’t easy. It takes perseverance and hard work, but in terms of your whole life, it’s not that much time . . . and it can provide some of the biggest opportunities of your life.

John Desjarlais Jr. loved growing up in Cumberland House. He loved the culture of community and living an outdoor life, hunting, fishing, gathering. But getting an education meant moving away from home – far away. Now, with a young family of his own and an established career at Cameco’s Key Lake mine, he’s hoping to make the move back home.

How long have you worked at Cameco?
Since 2001. My dad has worked for Cameco for years, so he was a big influence when I was trying to figure out what to do. After some university, I took the Radiation & Environmental Monitoring Technician program at Northlands College in La Ronge so I could get into the workforce. I got a job with Cameco and progressed to supervisor as a Radiation Specialist.

Job Prospects – Good. Mechanical engineers deal with systems that involve motion – aircraft, automobiles, robots, hydraulic control systems and heating, ventilation and air conditioning systems in buildings. It encompasses both traditional areas of engineering such as mechanics and emerging areas such as nanotechnology. Average annual wage in 2011 was $93,000.

Education. You need a bachelor’s degree in mechanical engineering or related engineering discipline. Check out the University of Saskatchewan, University of Regina and First Nations University of Canada. For more options, check out technical diploma and certificate programs at SIAST and SIIT.

Get the NOC Code. The NOC (National Occupational Classification) code for Mechanical Engineers is on page 23 of the Job Chart. For more info, enter the code at the NOC website, www5.hrsdc.gc.ca/NOC/English/NOC/2011/Welcome.aspx.
Life is multiple choice. And we have the answer key.
goSIAST.com

Why SIAST?

SIAST grads get jobs.

93% surveyed after 6 months were employed – here’s why:

- 150+ programs
- Hands-on learning
- Job-ready skills
- Small class sizes
- Expert instructors

You probably know someone who’s done this or maybe you’ve done it yourself – posted something you regret on Facebook. But it’s just for your friends, right? Maybe not. Here are our top 10 tips to make sure your future boss will still want to hire you after seeing your social media (and they will look).

#1: If you say it, it will last. If you wouldn’t say it to your mom/teacher/boss/boyfriend, don’t post it online.

Important! Did you know your tweets will show up in a Google search? Once you post online, it’s there FOREVER. Think before you tweet.

#2: Monitor your security settings. Have you heard the story of the girl who posted her party event on Facebook and left the setting at Open to the Public? Thousands of unwanted guests showed up. Seriously, look it up.

Important! Take an afternoon to look at your Facebook security settings in detail. Read a tutorial (See ‘Quick tutorial – understanding Facebook security settings’ on YouTube). As Facebook changes security features almost monthly, be sure to do this 2-3 times a year.

Reminder – Did you know that your mom/teacher/boss/boyfriend might be able to see your WHOLE profile? Click on Privacy Settings from the Home button (top-right corner beside your name) to adjust your settings.

#3: Never, never give out your password. Did we say never? If your boyfriend/girlfriend insists on checking in on you, JUST SAY NO! Your social presence is your personal information. No one has the right to see it but you.

Important! If someone is pressuring you for your password or to do anything you are uncomfortable with, speak to someone you trust — a teacher/counsellor/parent/kid’s help phone. If the wrong people get your information, they could destroy your reputation (for no reason) or even steal your identity. Keep your passwords safe.

Reminder – Change your password every few months. Try to use numbers and symbols; it makes it harder for someone to guess (for example, No*hack$2012 or hack50yourself%). Don’t write it down; memorize it, and try to use different passwords for different websites.

#4: Only ‘friend’ your friends. If you don’t know them, why would you ‘friend’ them? Social media is a way to stay connected to real friends.

Important! Don’t get caught up in the numbers game (i.e., who has the most friends). Recently, a company sent out 100 ‘friend’ requests. More than 40 blindly accepted, giving that company access to birthdays, emails, phone numbers and addresses. Would you want a stranger to have access to this information? (If you say yes, please re-read this article).

Reminder: If you ‘friend’ your co-worker, they will see more of your profile. And they can share that with others, including your boss. Be conscious of having co-workers as Facebook friends.

#5: Tag photos with care. In fact, be careful about what photos you allow to be taken of yourself. If your friend posts a photo of you that’s in bad taste and tags you, you need to (a) untag yourself and (b) ask your friend to remove the photo.

Important! You have NO CONTROL over the photos others post of you (except for untagging yourself). If you don’t want that picture online for everyone to see — don’t take the picture in the first place.
#6: Applications may not be your friend. First, this is the easiest way for someone to hack your account. Second, if you’re not careful, ALL of your friends will know what applications you’re using. Do you want your boss to know you play Pokemon vs. Sponge Bob? Probably not. Be careful when allowing applications to access your Facebook account. If you’re unsure, just say no.

Important! Your online names matter. So do your emails. Which handle looks more professional: yourname@email.ca or sweetumsxoxo@email.ca? Your choice can affect your job applications.

Tip: Try linking a backup email to your Facebook account instead of your main email. That way if your information is compromised, your main email will still be safe.

#7: Try LinkedIn. LinkedIn is like Facebook for professionals. Use it as your online resume. Be sure it looks professional. Have a trusted friend/teacher/counsellor/parent look it over. There’s a good chance your new boss will.

Important! If you wouldn’t post it on LinkedIn, you may not want to post it on Facebook or Twitter. Some things are better for Facebook than LinkedIn, like pictures of you with friends, but again, if you don’t want your boss to see it, don’t put it online.

#8: When in doubt, take it out. If you think any of the wall postings, friends, applications or photos you’ve uploaded might hurt your chances of getting the job, remove them.

Important! Even if you remove a photo or post, people might still have access to it. They may have saved the photo or taken a picture of that post. It’s best to not put anything online that could come back to haunt you, but if you have, remove it as soon as you can.

Reminder – When applying for jobs, be sure to clean up your online accounts. Delete posts, pictures, applications and anything else you think could hurt your chances of getting the job.

#9: If you’re out, don’t tell about. If you want to invite someone out, call/text/instant message. If you tell everyone where you are, you might run into people you don’t want to.

Important! If you have the ‘Bender’, ‘Crunked’, ‘Player Please!’ ‘School Night’, ‘D*$%bag’, ‘S&t’ or many other FourSquare badges posted on Facebook (or ANYWHERE online, really), your friends might think you boss, but your boss won’t.

#10: To post or not to post: With posting comes responsibility. Search for ‘Annoying Facebook Habits’ for a quick lesson on what to post and not to post.

Important! No posts/pictures that are profane, sexual or show drugs/alcohol. Beware of posting things of a sensitive nature (political, religious, etc.). And try not to do any of the ‘Annoying Facebook Habits’ you just looked up.

Not cool: Your boss can see when you post something … and they don’t usually like it when you post something while at work.

IMNOTATWIT
Can’t remember all the tips? Use the anagram “IMNOTATWIT” (I’m not a twit).

A final reminder – If you post it, it will last. Don’t post anything you don’t want EVERYONE to see forever. Remember this and your social presence shouldn’t affect your job chances.
